specialized in the
requirements of tourism sector

Our Software Team
Our software team consist of software engineers with more than 10+ years of experience

Our Training & Support Team
Talya provides 7/24 support service with 50+ people

Why elektraweb

All – In – One Solution

Elektraweb is the most comprehensive cloud hotel management software on the market; it is a full PMS including booking engine, channel manager, rate manager, POS, and other addditional modules. It has all the features and functions your hotel may need

Cloud and Web - Based

Elektraweb is hosted by Microsoft Azure and can be used by any web browser therefore it is accessible from any computer or mobile device anywhere in the world. Compared to on-premise systems, it is much more efficient due to its on-the-go accessibility

Latest Technology

Elektraweb uses the latest technology (Google's Angular Framework, Reactive Web Programing and NodeJS) that is why it is extremely fast, efficient, and compatible with all devices and browsers

Cost Effective & High ROI

Elektraweb has cloud hosting and SaaS license therefore it does not need any server, expensive licenses nor any maintenance or upgrade costs. That is why it is very cost effective and has the highest ROI

Reliable

Elektraweb is hosted in Microsoft Azure Cloud Servers that may be the most powerful and protected data centers in the world. It is backed up in more than 24 points in the world.

Secure

Elektraweb uses SSL for data transfer, secure tokens for authentication mechanisms, and several AI guard algorithms for malicious attacks. It is one of the best protected systems in the world.

Easy To Use

Since Elektraweb uses Google’s Material Design which has a very familiar interface, it is both user-friendly and easy to use

Mobile

It is completely responsive and fully functional on tablets and phones in addition to desktop systems

Multi Property

Elektraweb has many special functions and reports for group hotels and chains. It provides shared consolidated reports for occupancy, income, ADR, and aggregation of financial statements. It also provides shared use of information about guests, agencies, and reservations

Customizable

Elektraweb is easily customizable for any size and type of hotel due to its flexible parameters

Scalable

Since it is hosted in cloud servers, CPU power and storage capacity can be easily expanded or decreased depending on your needs

Interoperable

Elektraweb has a public API for communication with other systems, so integration to other external systems such as banks, door locks, and pay tv etc. can easily be done

Enhanced Support

Elektraweb has 24×7 online support ; an expert will be with you looking at the same screen anytime you need

- PMS
- BOOKING ENGINE
- RATE MANAGER
- POINT OF SALE (POS)
- SPA MANAGER

- Reservation

RESERVATION

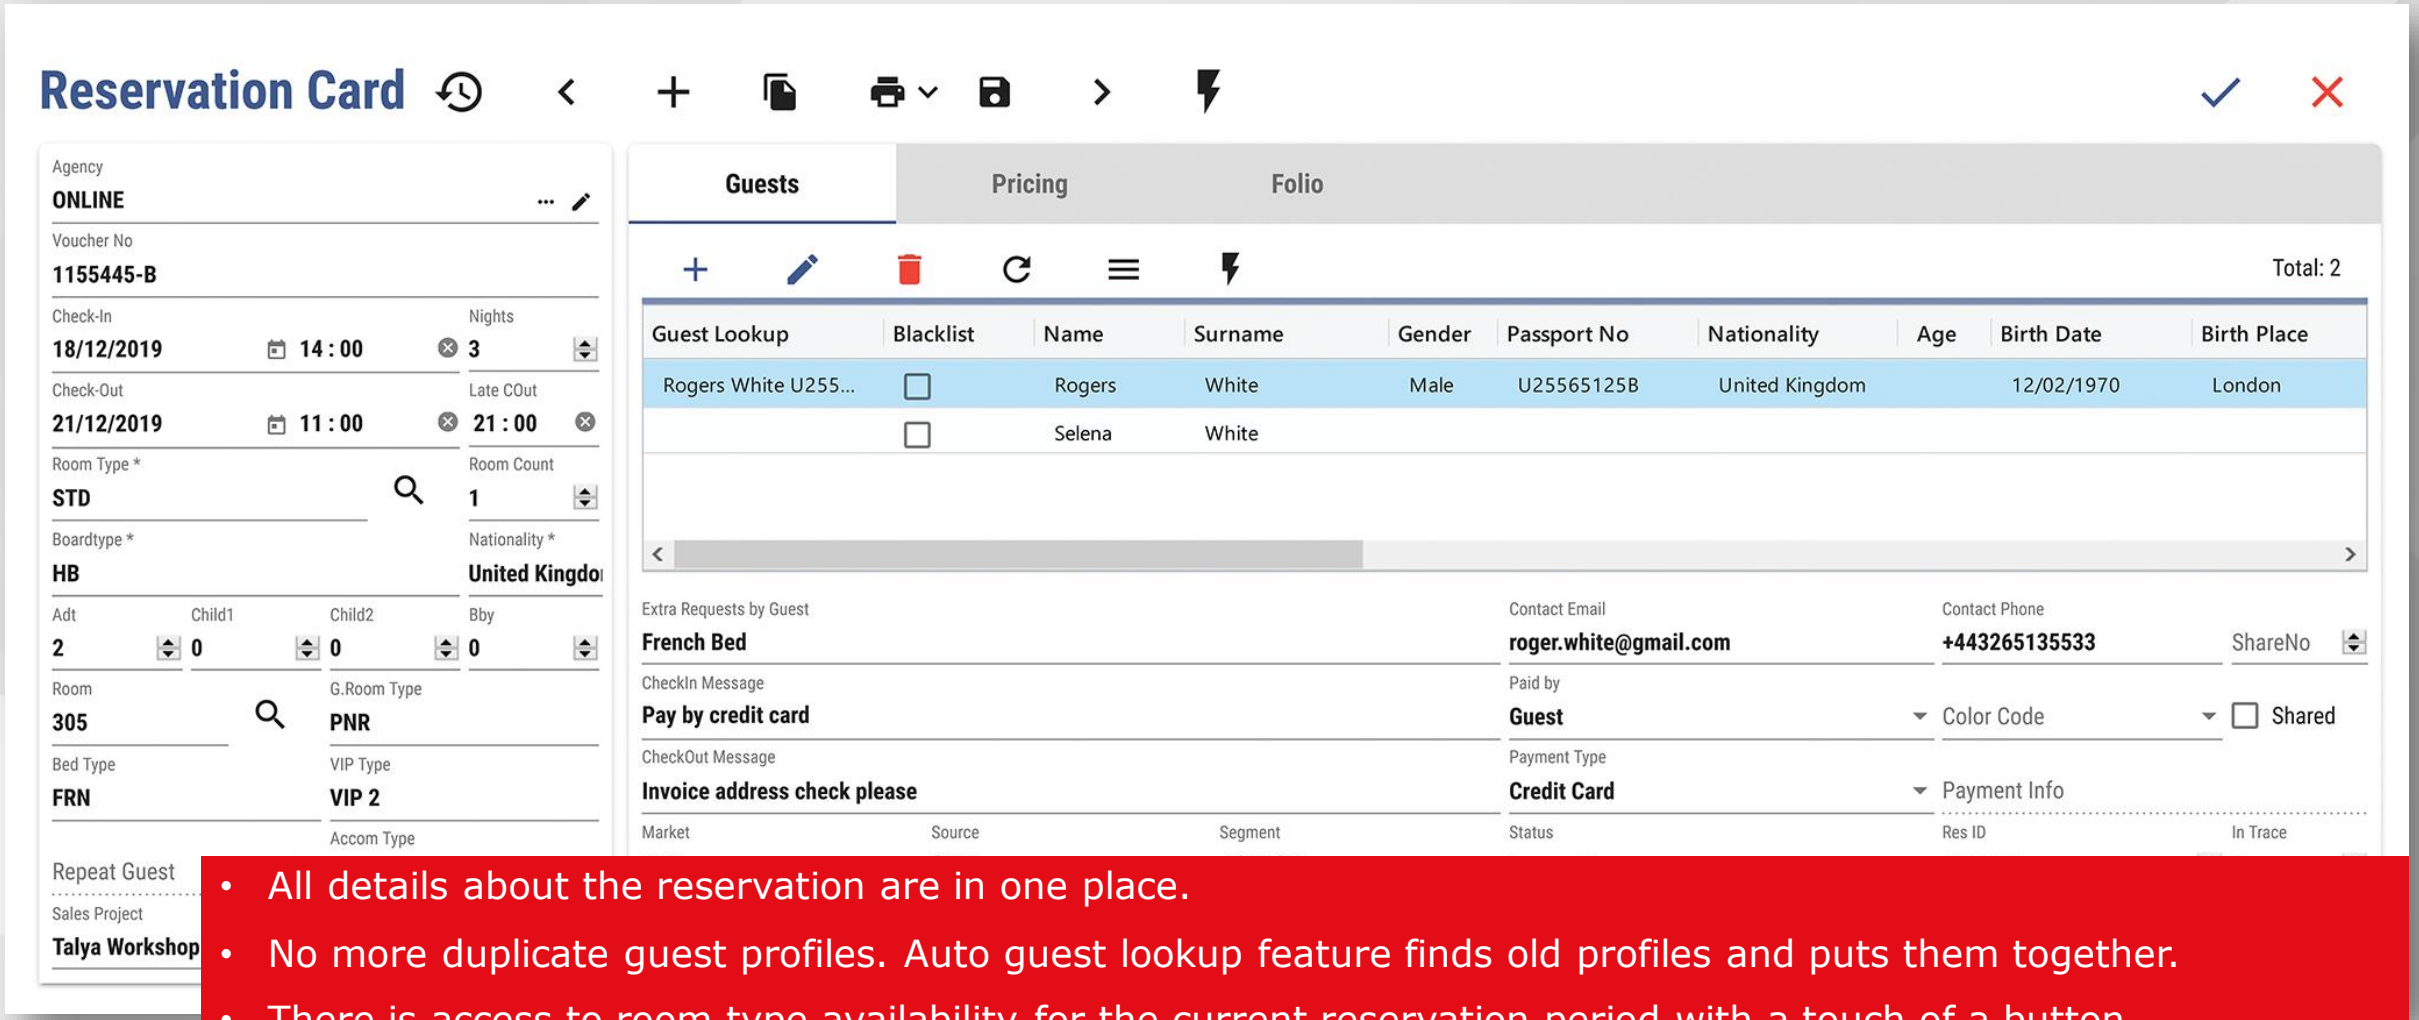
- You can list, sort, group, and filter all of your reservations by any criteria with a single click.
- By the help of color codes, important information becomes more visible.
- All functions are accessible with a single click after selecting a single line or multiple lines.
- All screens can be exported to Excel or to the printer in different formats.
- In the listings multiple sorting, filtering, searching, grouping are standardized.
- Thanks to its digital archiving capability, one or more documents can be stored in the related record by scanning or uploading.
- Users can view only the allowed screens and run the allowed functions depending on their authority.

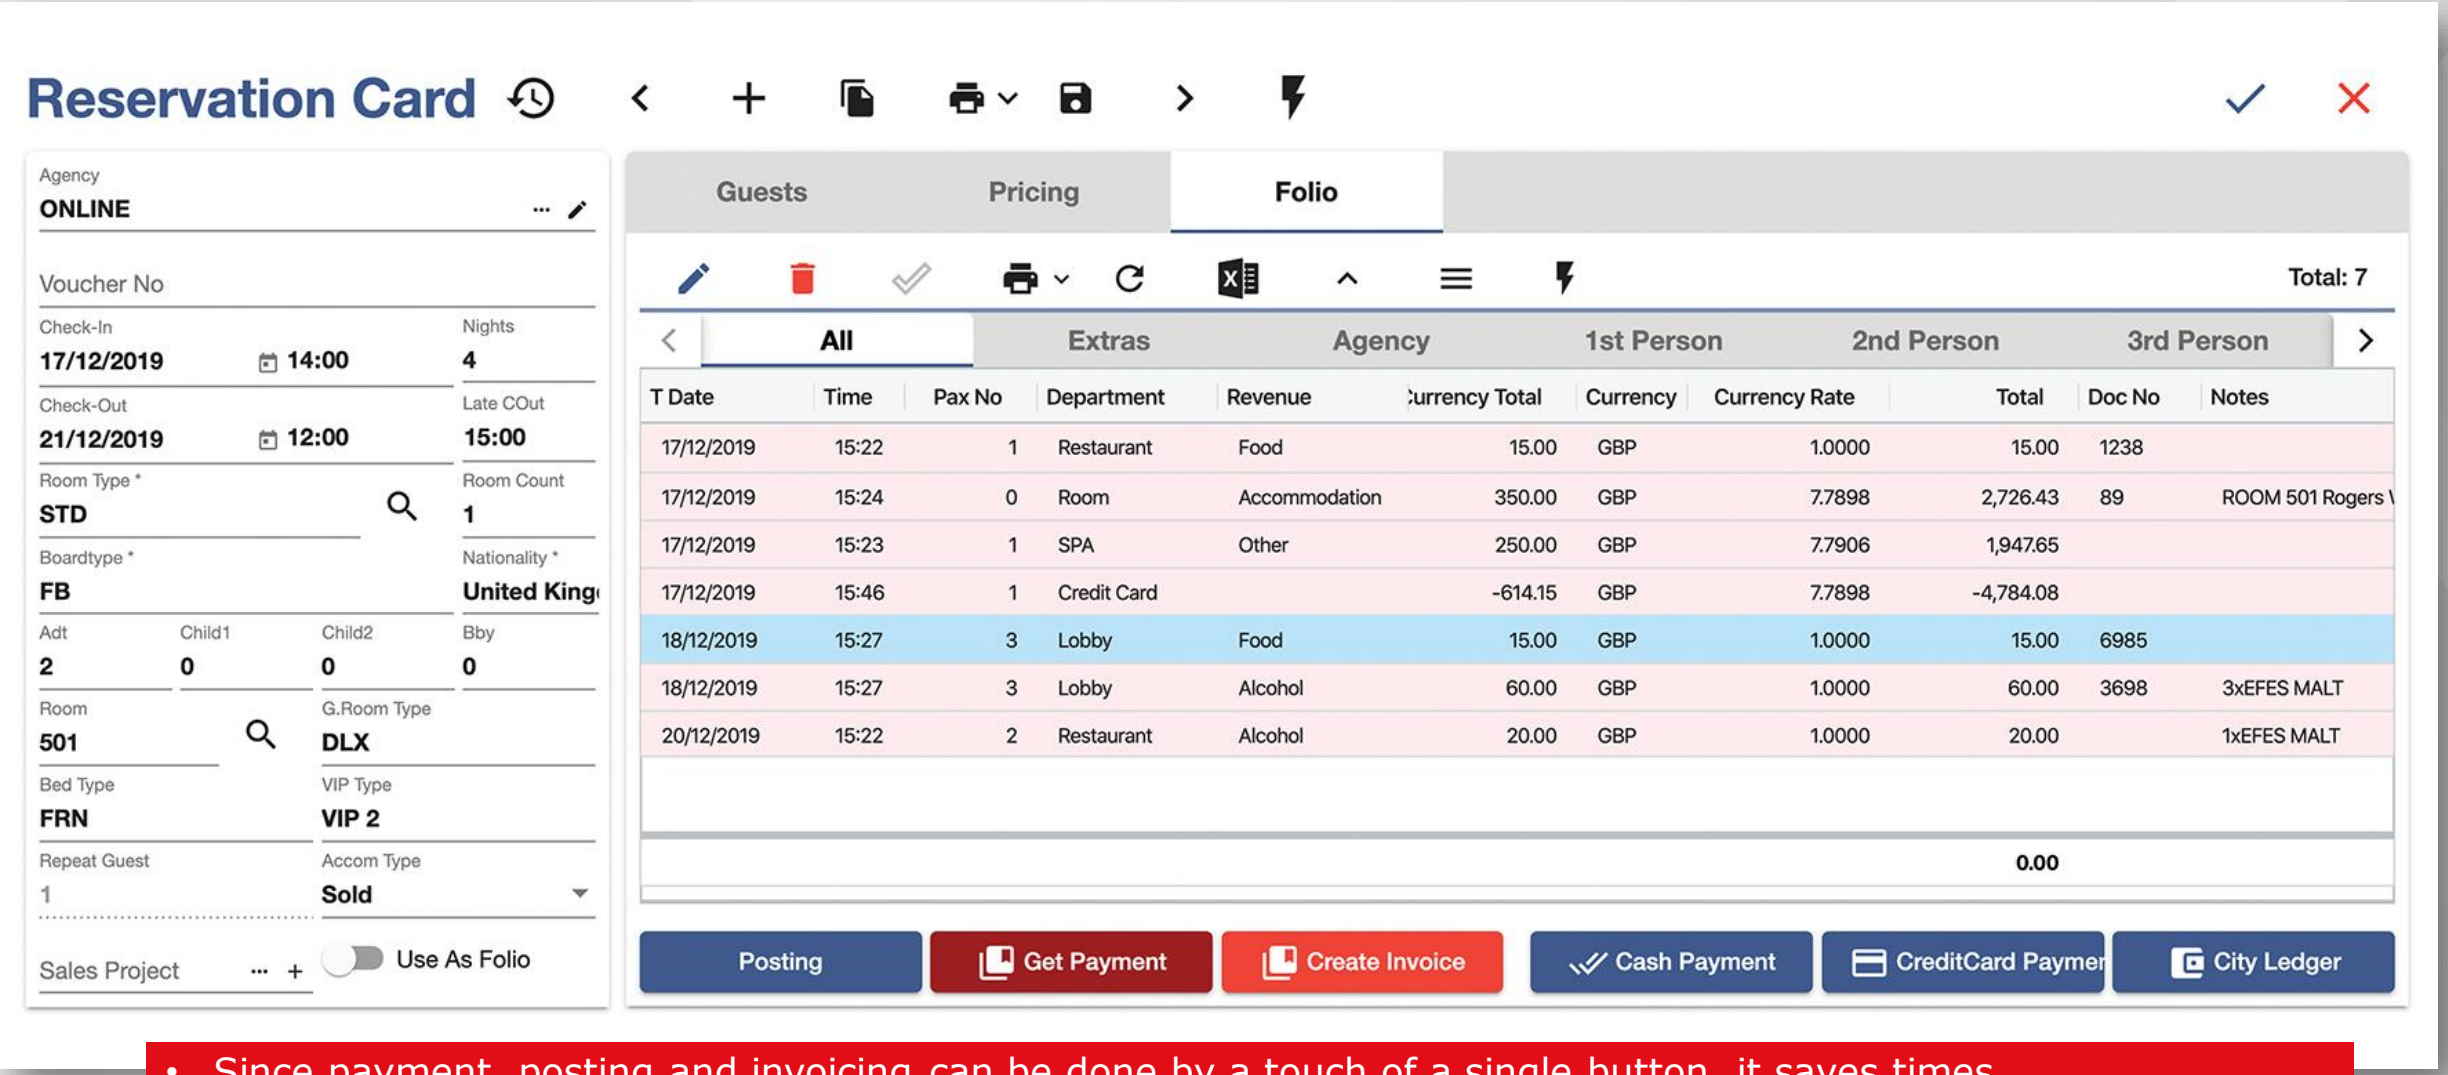
RESERVATION CARD

elektraweb



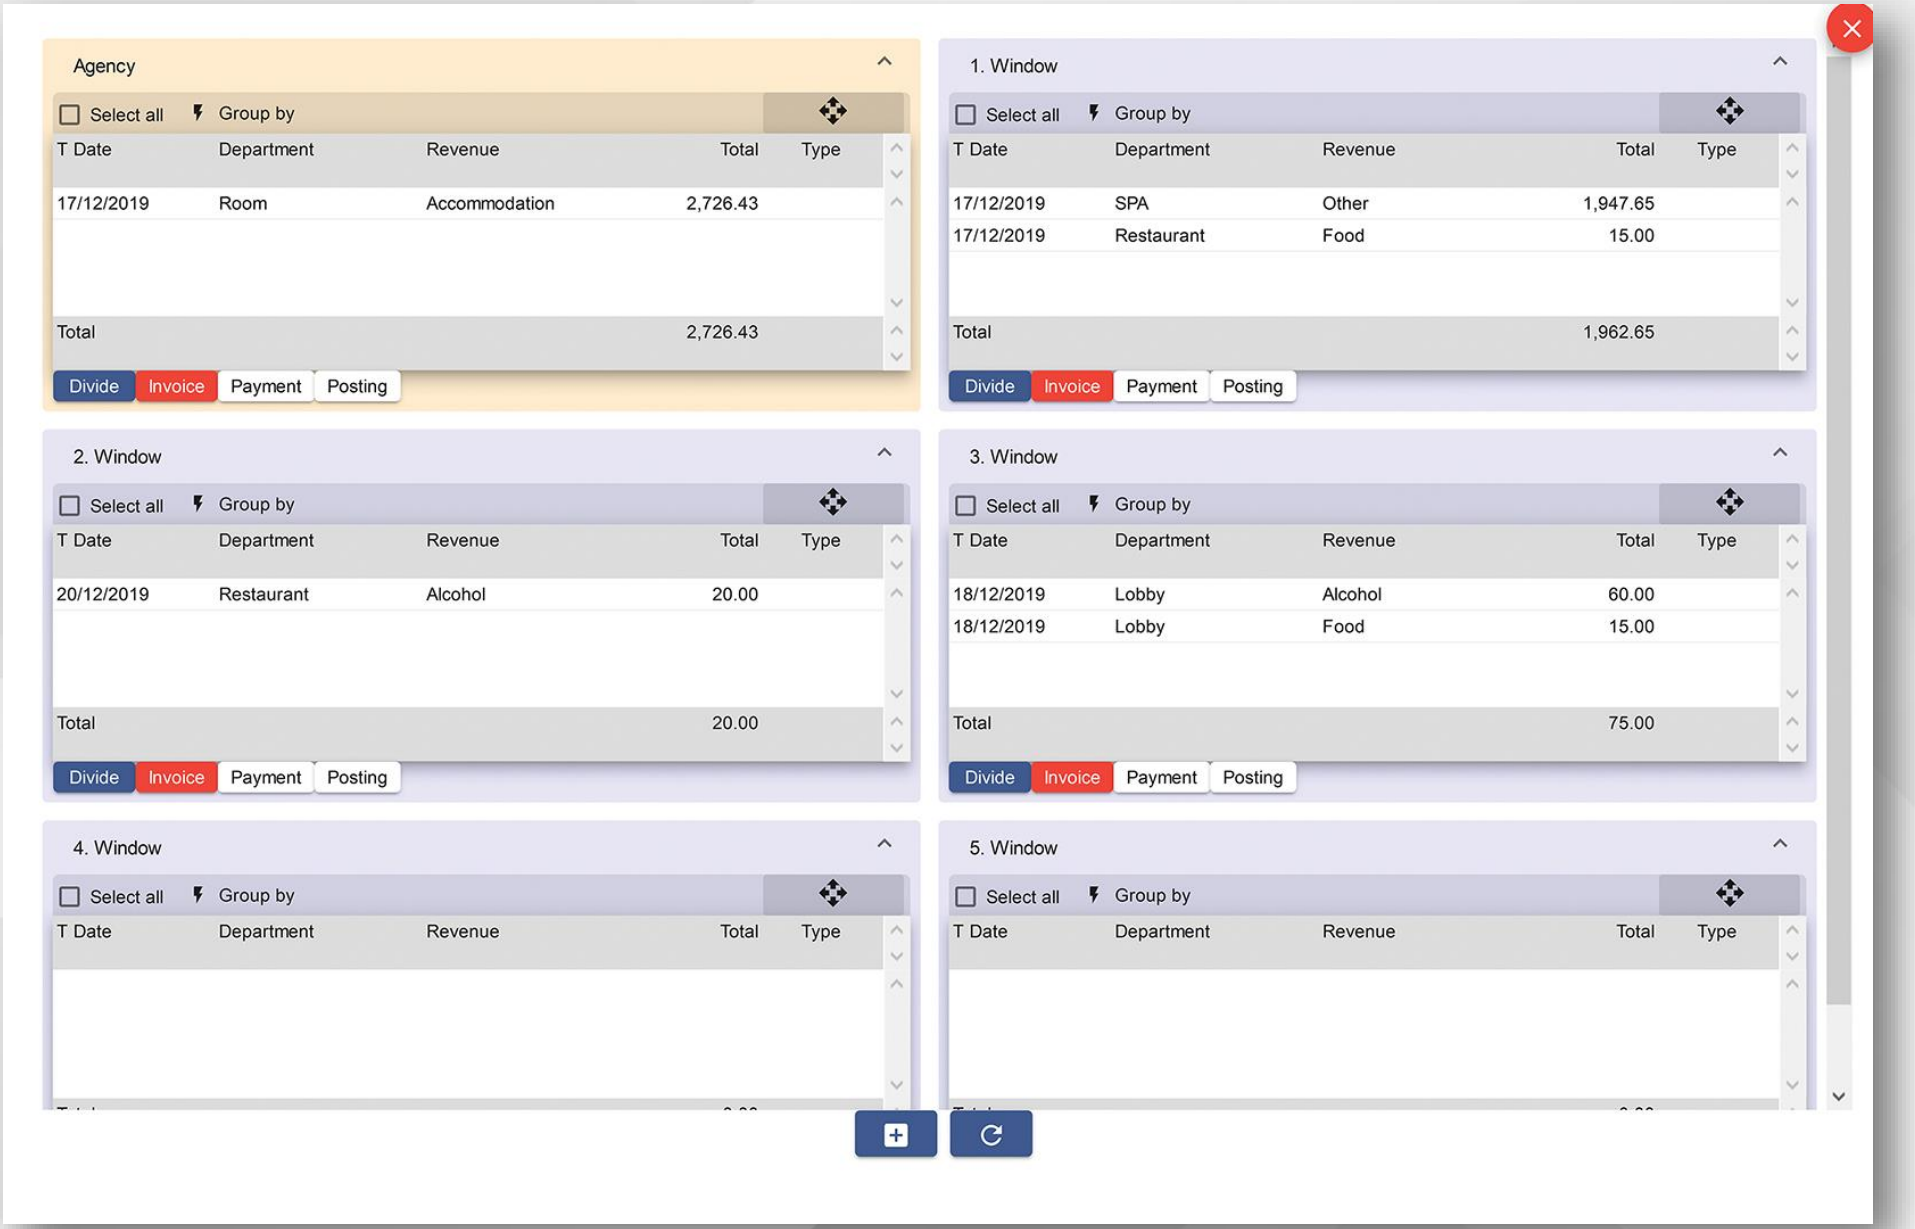
- All details about the reservation are in one place.
- No more duplicate guest profiles. Auto guest lookup feature finds old profiles and puts them together.
- There is access to room type availability for the current reservation period with a touch of a button.
- It has the ability to block rooms with one click.
- It has unlimited profile recording ability.
- There is authority control for access to the pricing tab; all data related to pricing is in one place.

FOLIO



- Since payment, posting and invoicing can be done by a touch of a single button, it saves times.
- Transactions can be entered in different currencies and it provides automatic conversion

FOLIO



- The room folio can be distributed to many different windows and each window can be separately billed.

FOLIO

South Point Hotel

09/01/2020 15:07

103 Folio

- Different types of folio print outs can be taken.

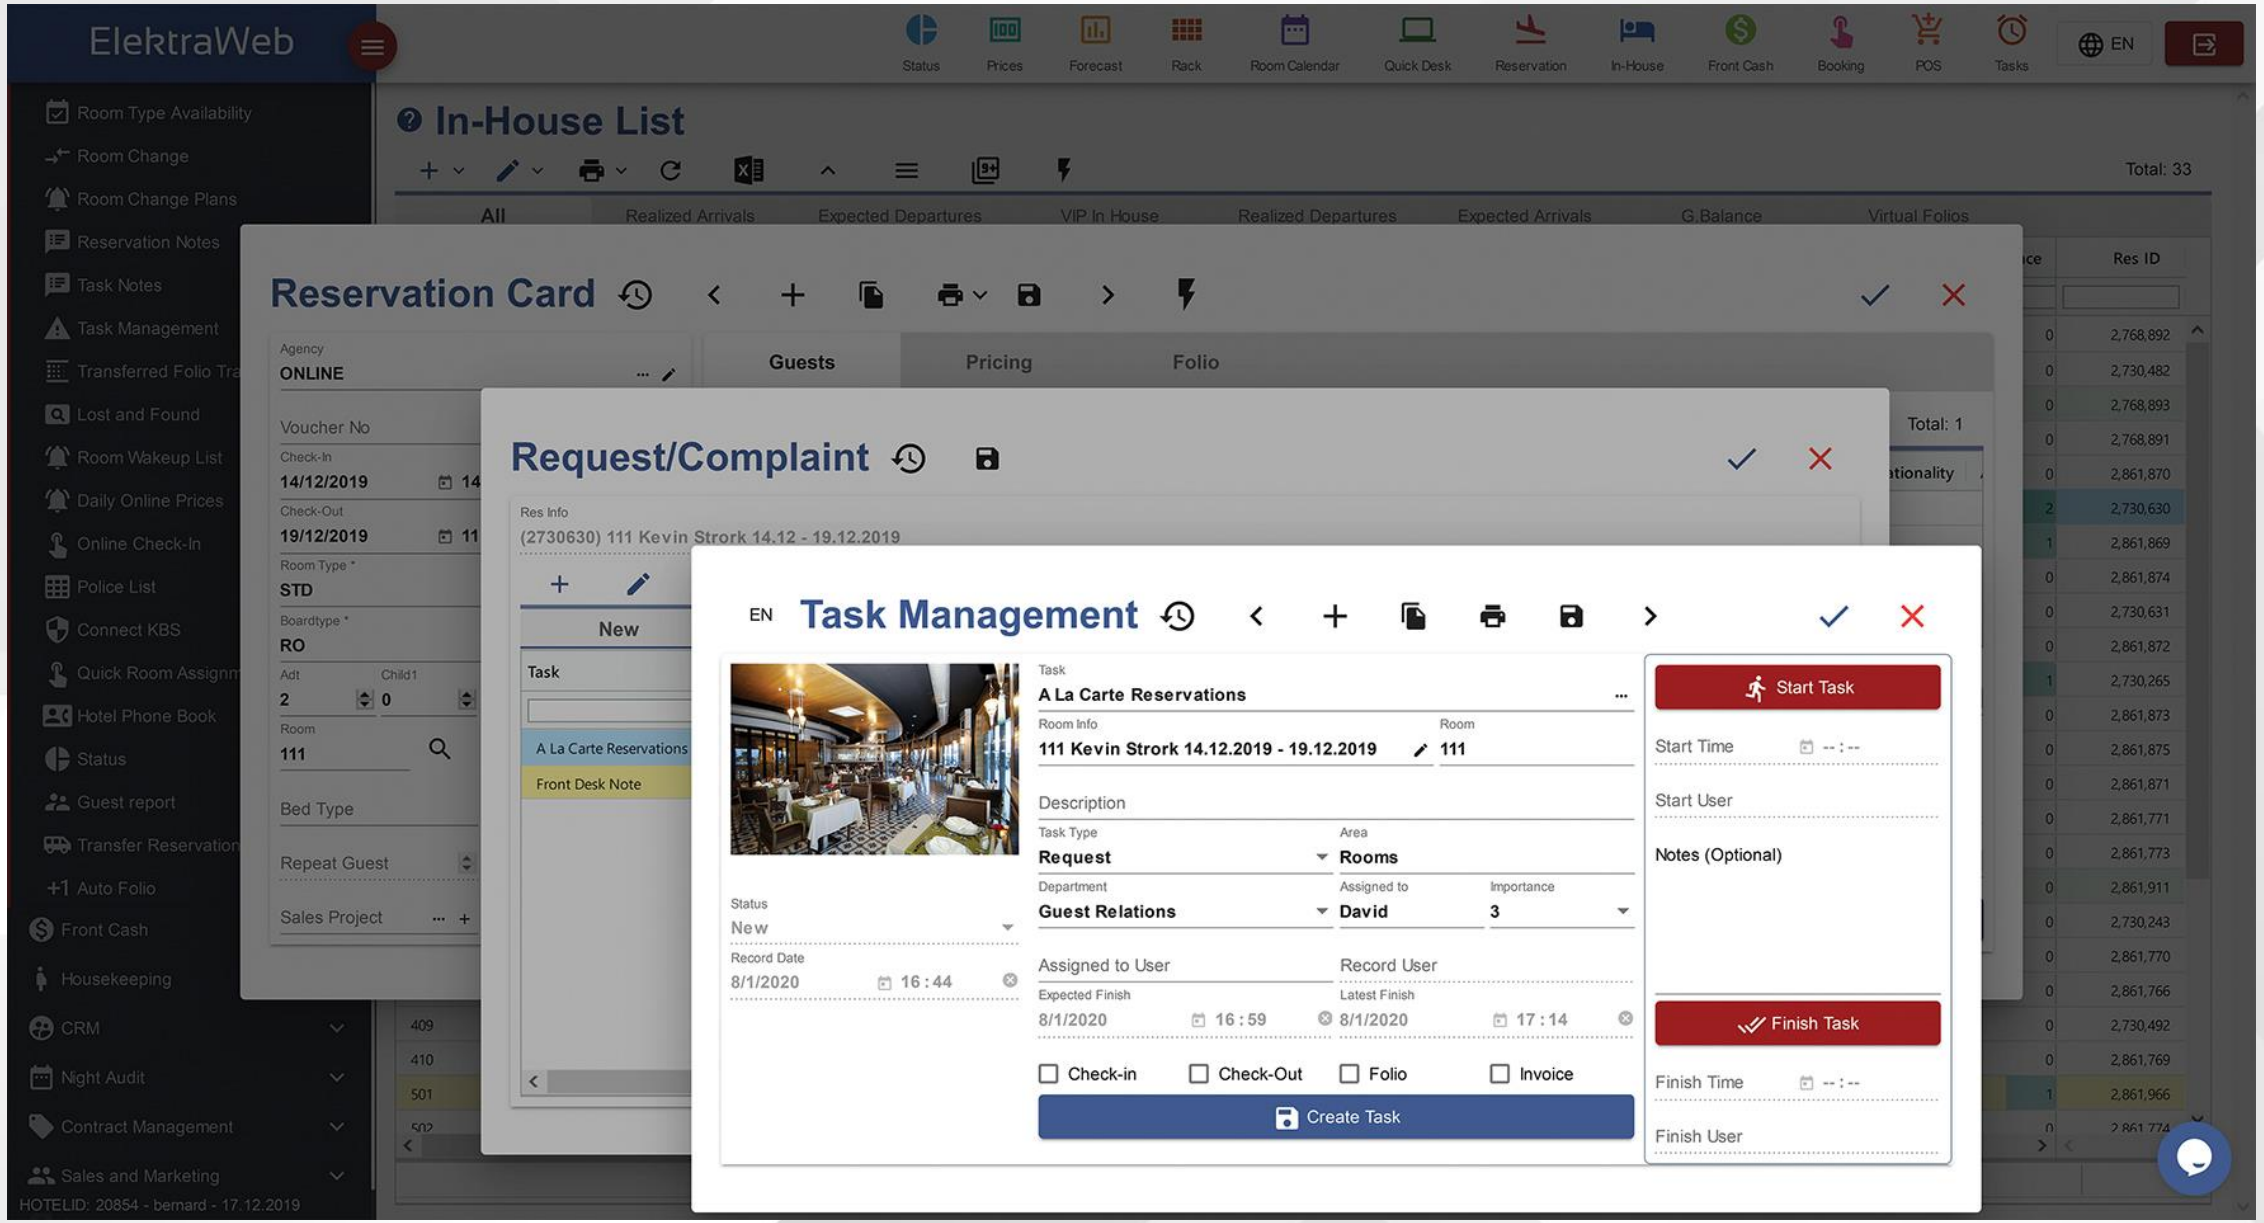
CRM – GUEST RELATION



TASK MANAGEMENT

Request

All requests and complaints entered get included to the automatic task management.

Task

The expected completion time is determined according to the definition of the task, the department, the authority, and the importance.

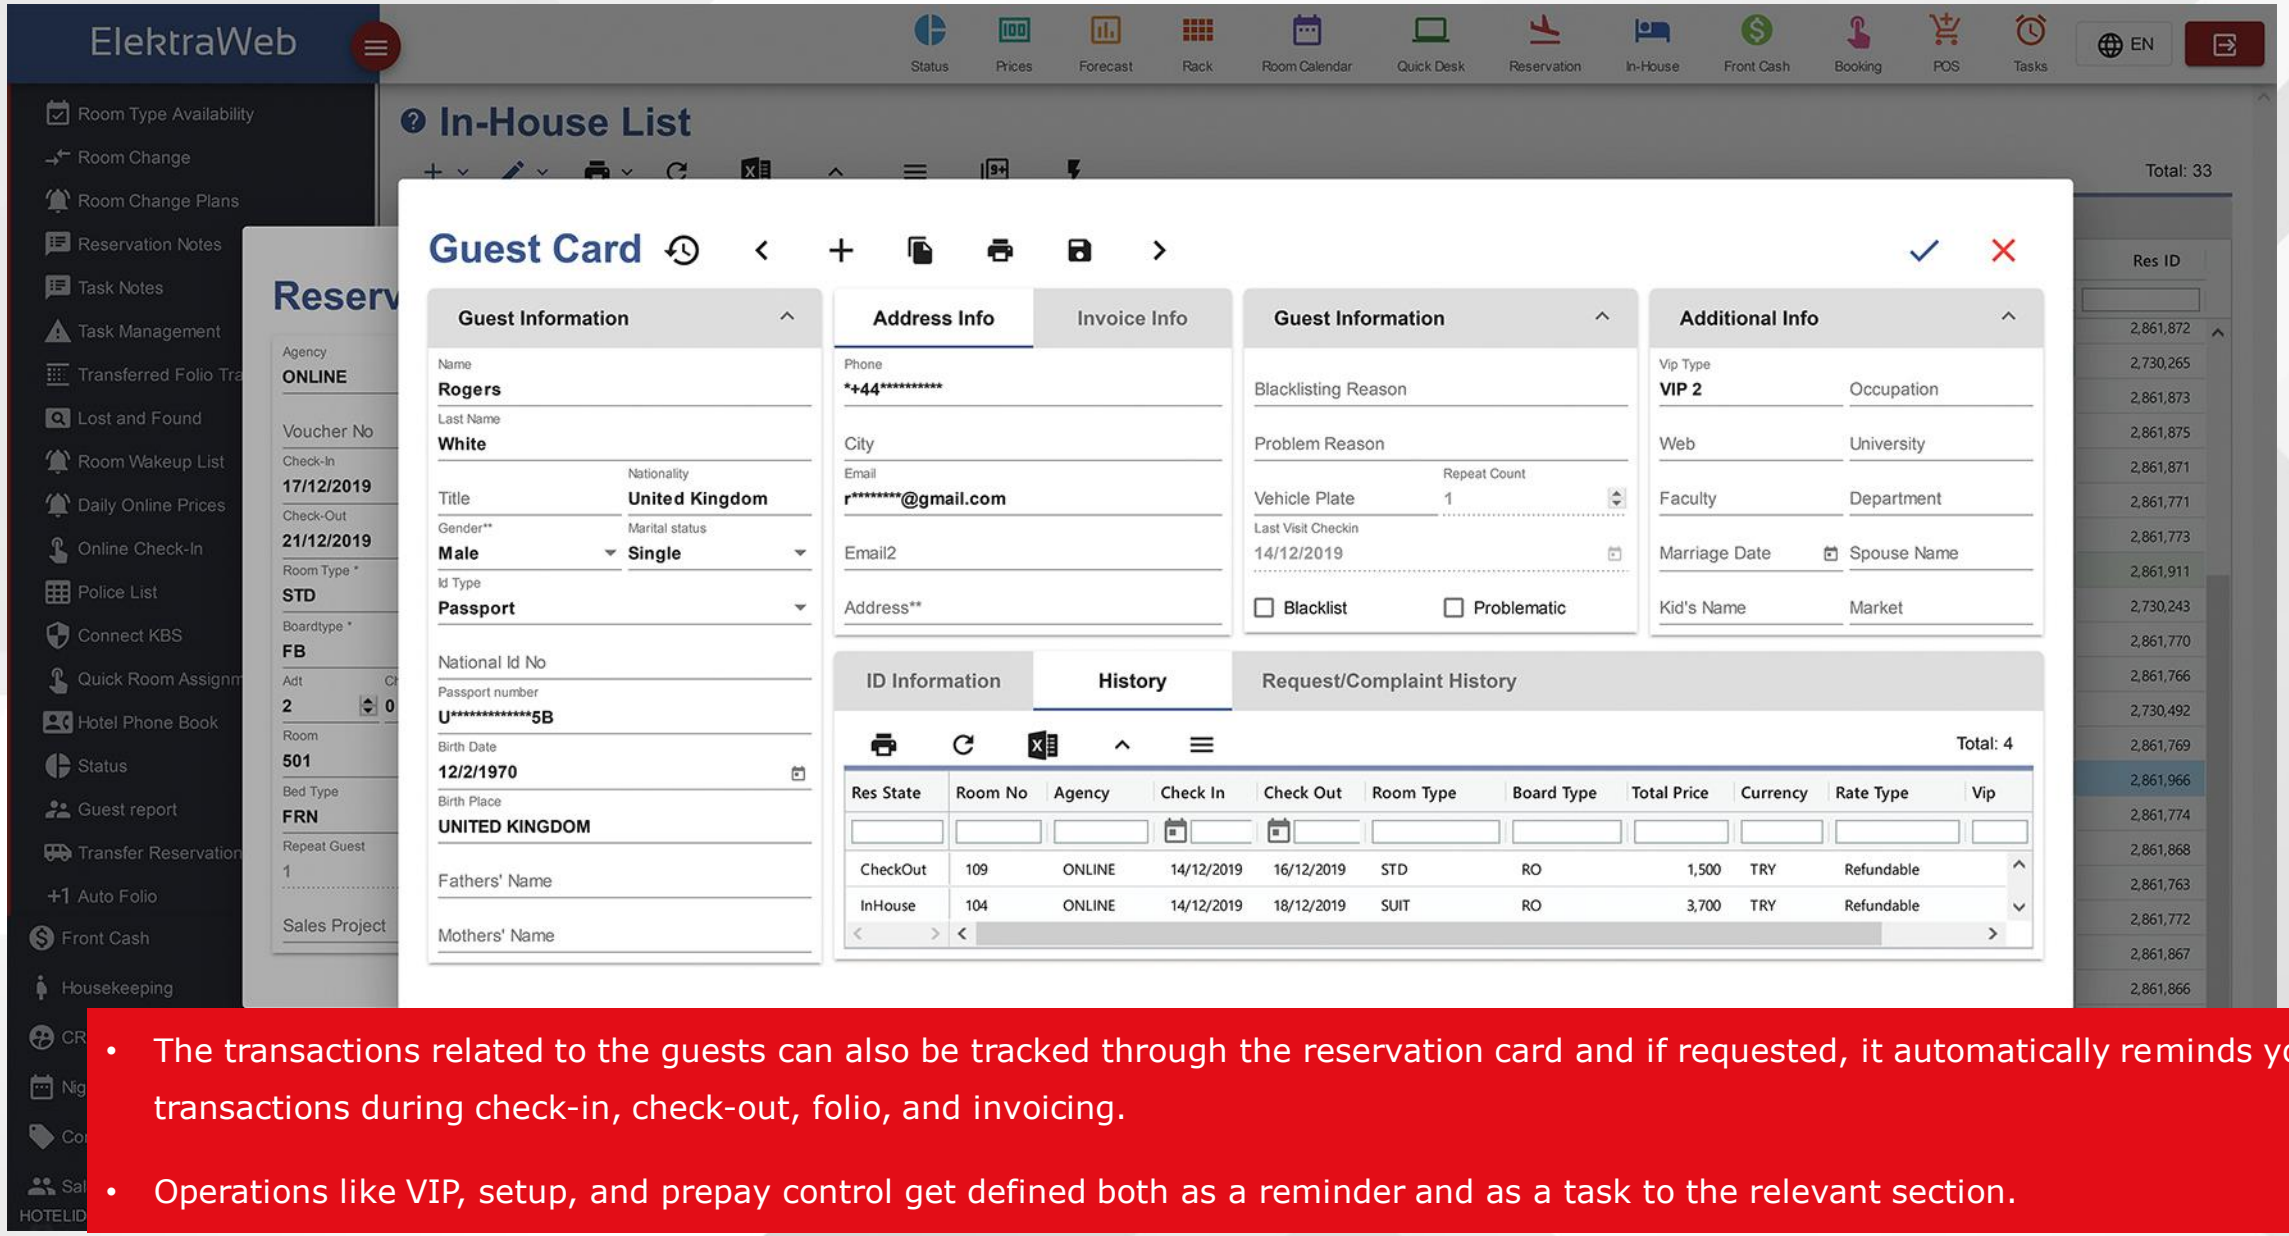
Work

The task falls to the screen of the relevant unit or mobile device. The person receiving the call starts by pressing the “start task” button and ends by pressing the “complete ” button.

Control

If the task is not scheduled and/or does not end in the max time frame, the message is automatically sent to a higher authority.

CRM – GUEST RELATION



- The transactions related to the guests can also be tracked through the reservation card and if requested, it automatically reminds you these transactions during check-in, check-out, folio, and invoicing.
- Operations like VIP, setup, and prepay control get defined both as a reminder and as a task to the relevant section.

DAILY STATUS

- Daily status window provides all critical information about the hotel on a single screen.
- You can view your hotel's occupancy, revenue, forecast, even call center notes both in graphs and lists.

CHANNEL MANAGER

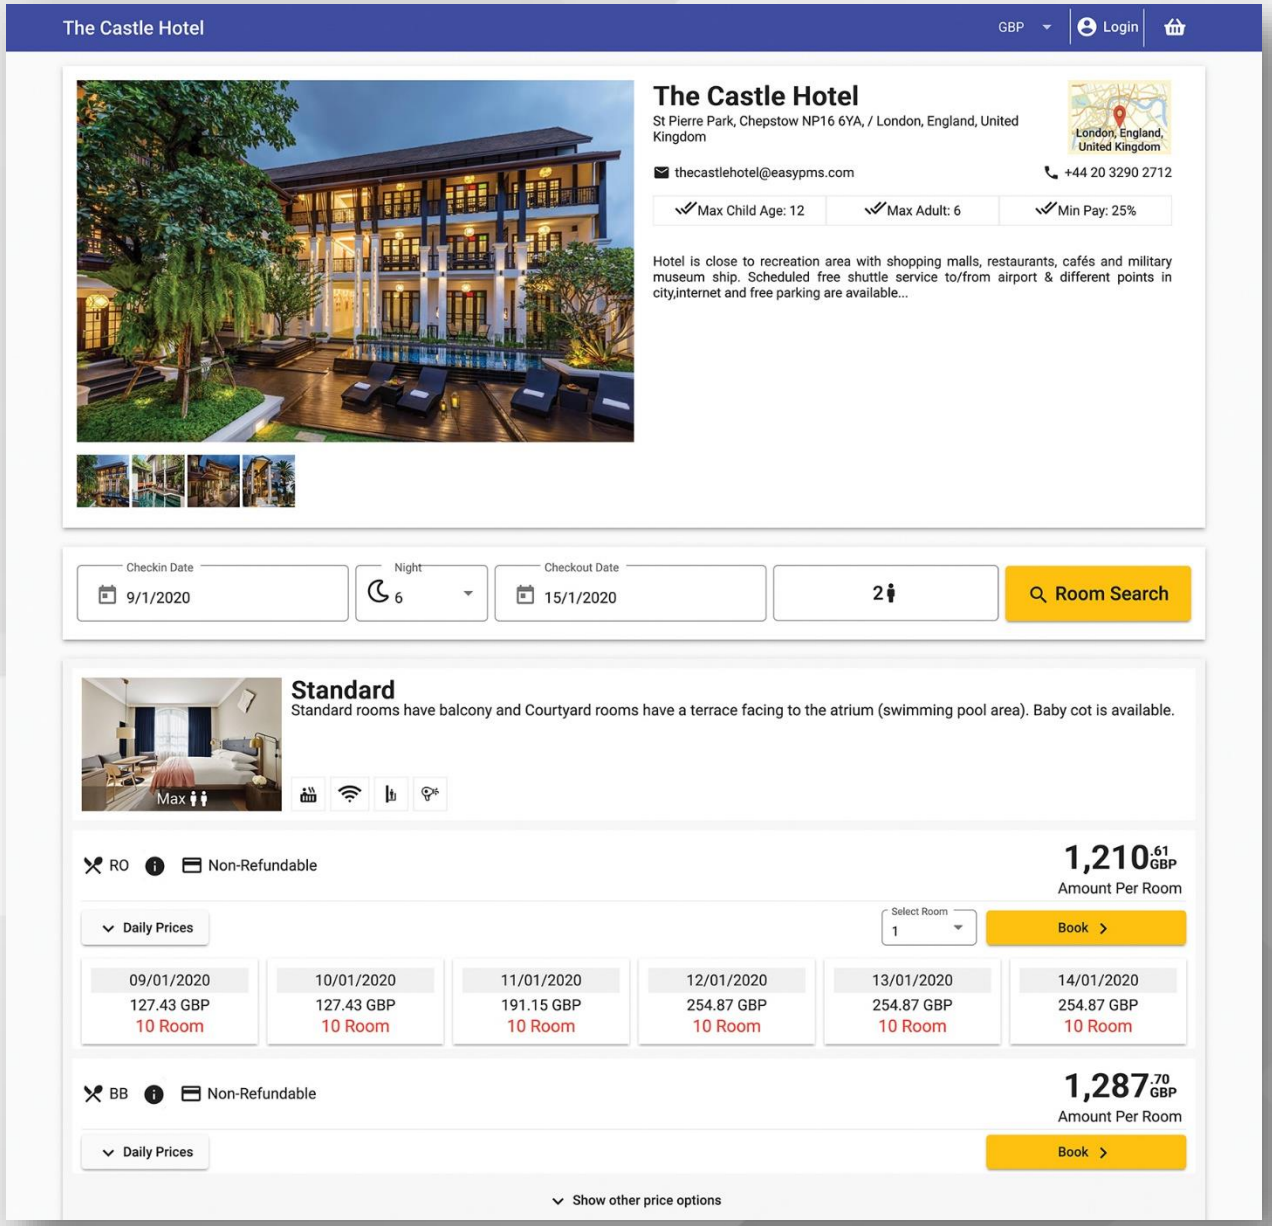
- Elektraweb has an integrated channel manager which does not only synchronize online channels (Booking, Expedis, Hotelbeds, Hotelspro etc) but also receives the reservations in the hotel. That is why it is much easier and more effective.
- Elektraweb has two-way connection that is occupancy information and prices are sent to channels and reservations are received.

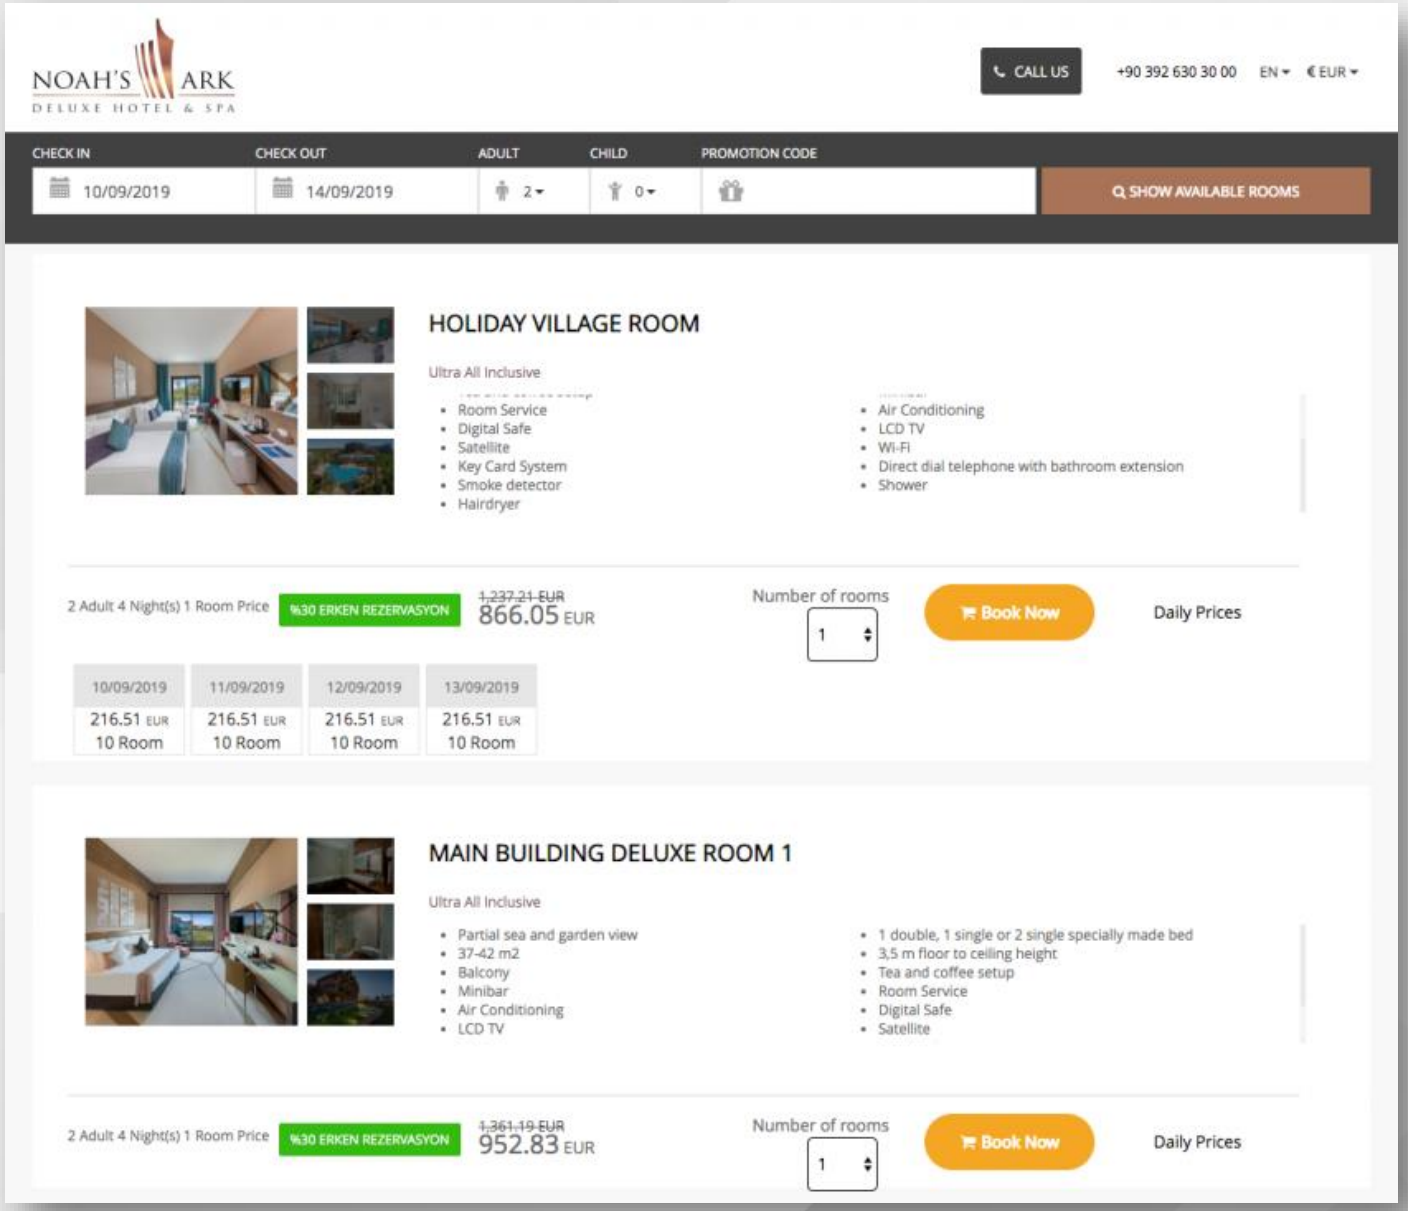
- Elektraweb channel manager system is very flexible. In addition to sending and receiving options, availability, discounts, and prices can be revised according to channels.
- Virtual room types can be used and virtual room type availability can be formulated based on actual room types.

BOOKING ENGINE



- It has an easy and fast interface.
- The view of booking page (content, colors, font, theme, back font etc.) can be customized according to the corporate identity of the hotel.
- Multiple reservations for different dates and room types can be done at once.
- It provides daily price and availability for each room along with the total price.
- It shows net prices besides showing prices and discounts separately.
- It lists all different price options for the same room such as refundable, nonrefundable, with or without breakfast.
- It is multilingual and multi currency. Daily currency rates are automatically updated.

BOOKING ENGINE



- During the reservation, customers can be monitored and contacted by online chat, they can click and talk, send call me forms.
- When a reservation is made, it sends a notification by SMS and e-mail both to the guest and the hotel.
- Different payment options such as cash, wire transfer, pay at hotel, credit card, and guarantee by credit card are provided.
- Guests can use promotion codes or previously earned bonus points.
- It is multilingual and multi currency. Daily currency rates are automatically updated.

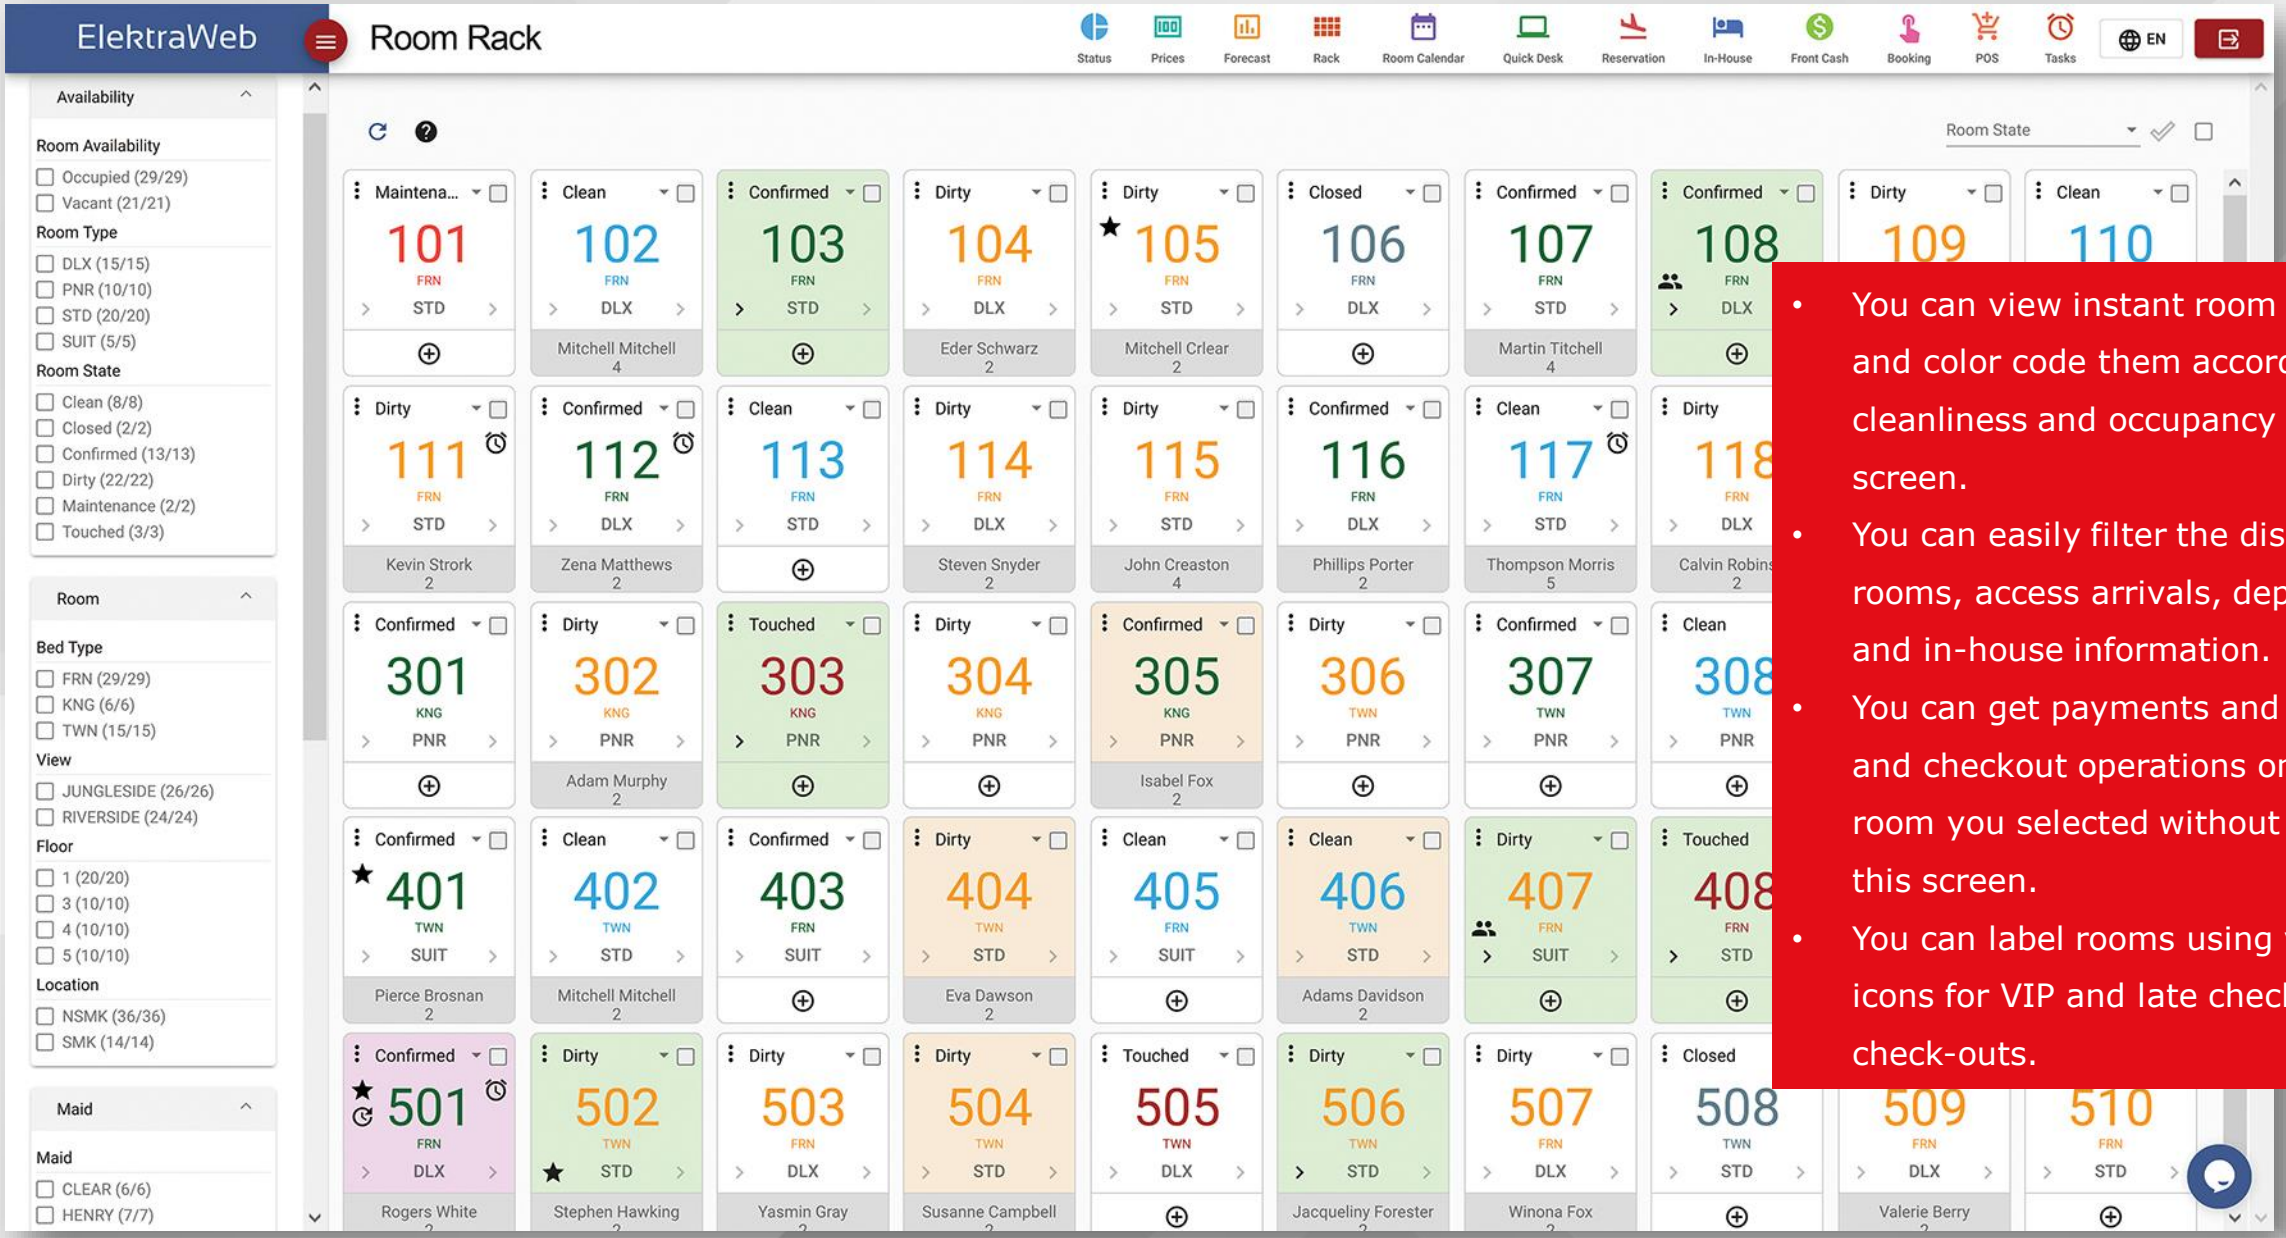
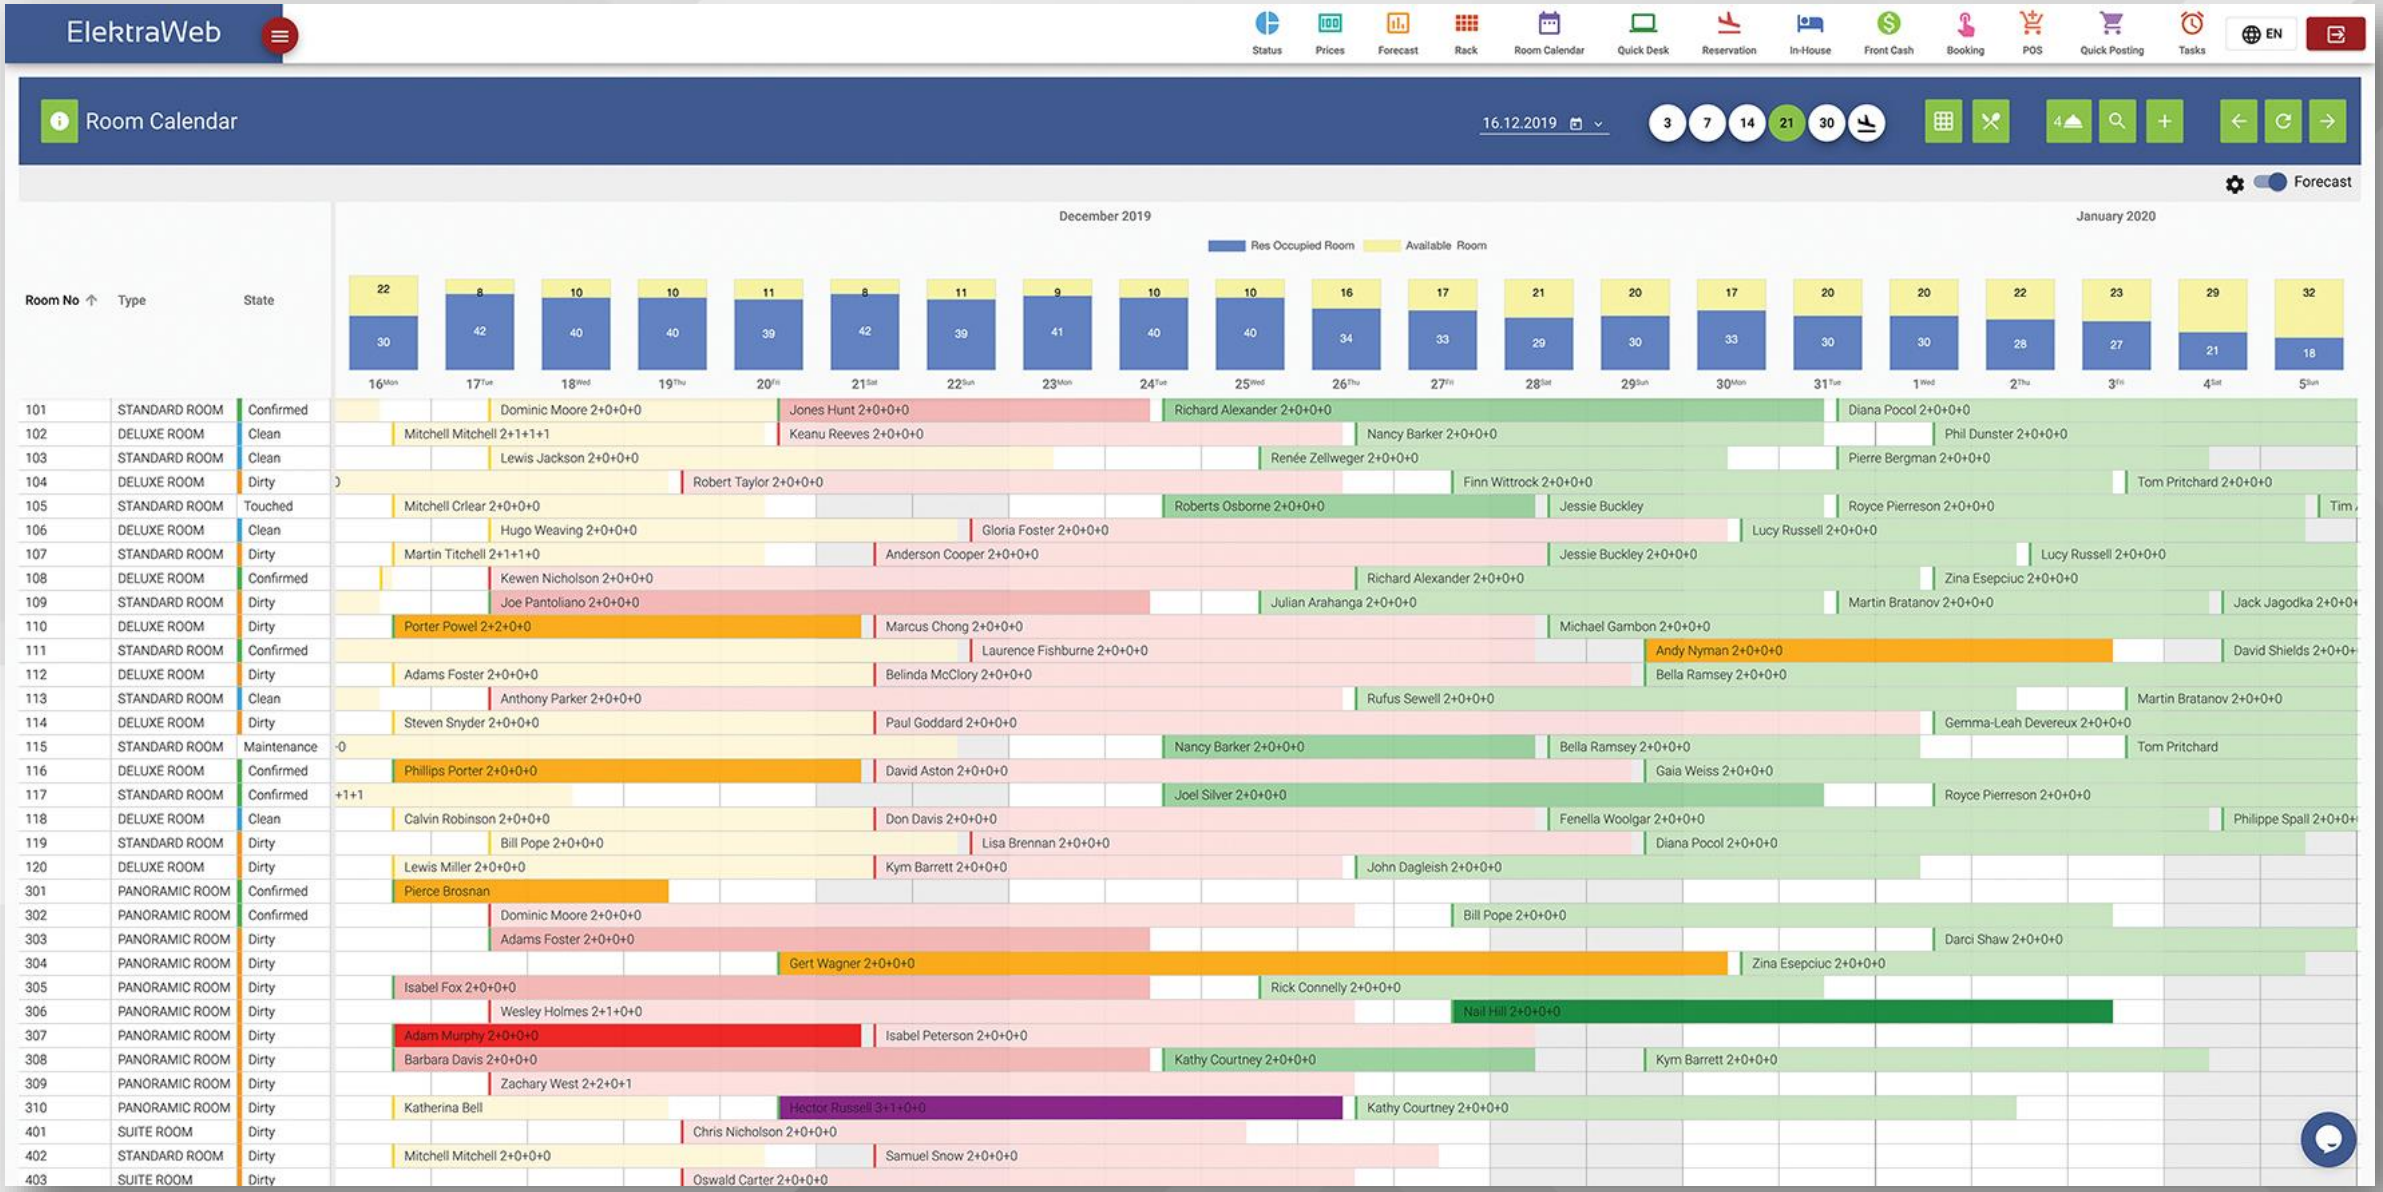
ROOMRACK

elektraweb

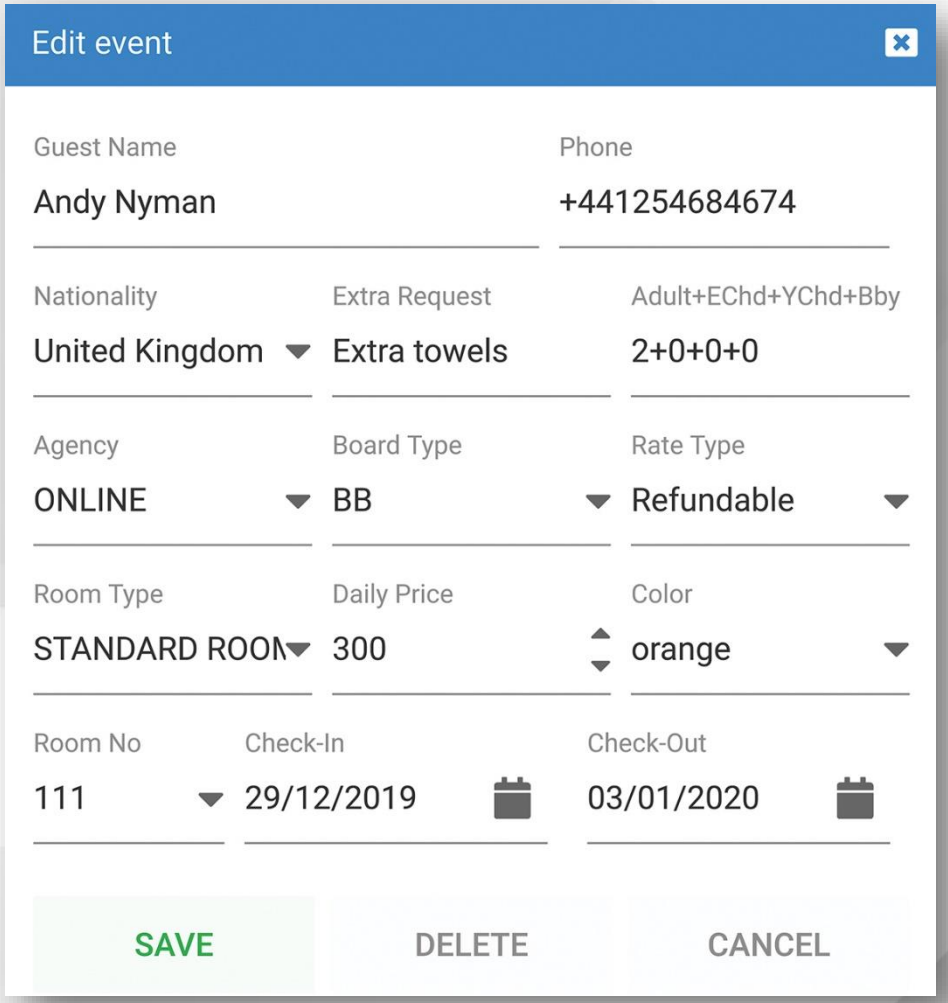


- You can view instant room statuses and color code them according to cleanliness and occupancy on one screen.
- You can easily filter the displayed rooms, access arrivals, departures, and in-house information.
- You can get payments and do folio and checkout operations on the room you selected without leaving this screen.
- You can label rooms using visual icons for VIP and late check-in and check-outs.

ROOM CALENDER

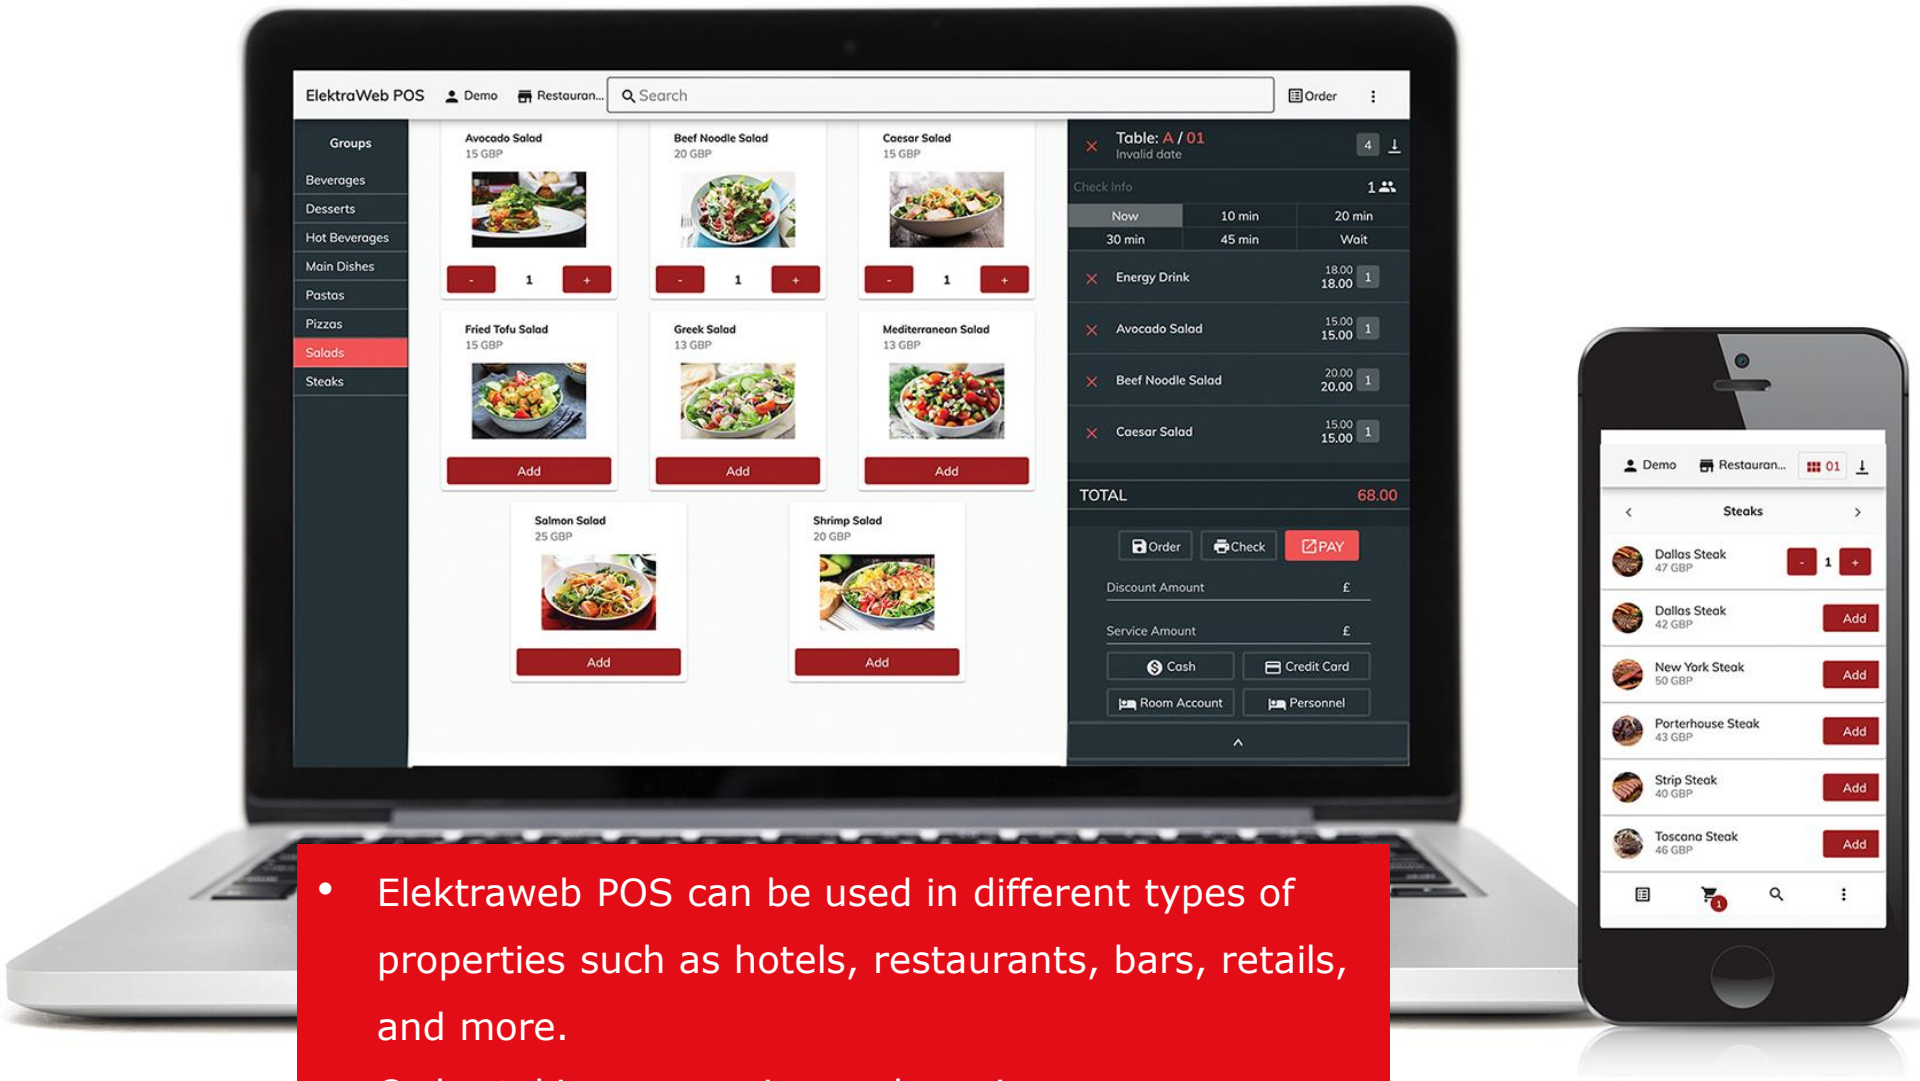


ROOM CALENDER



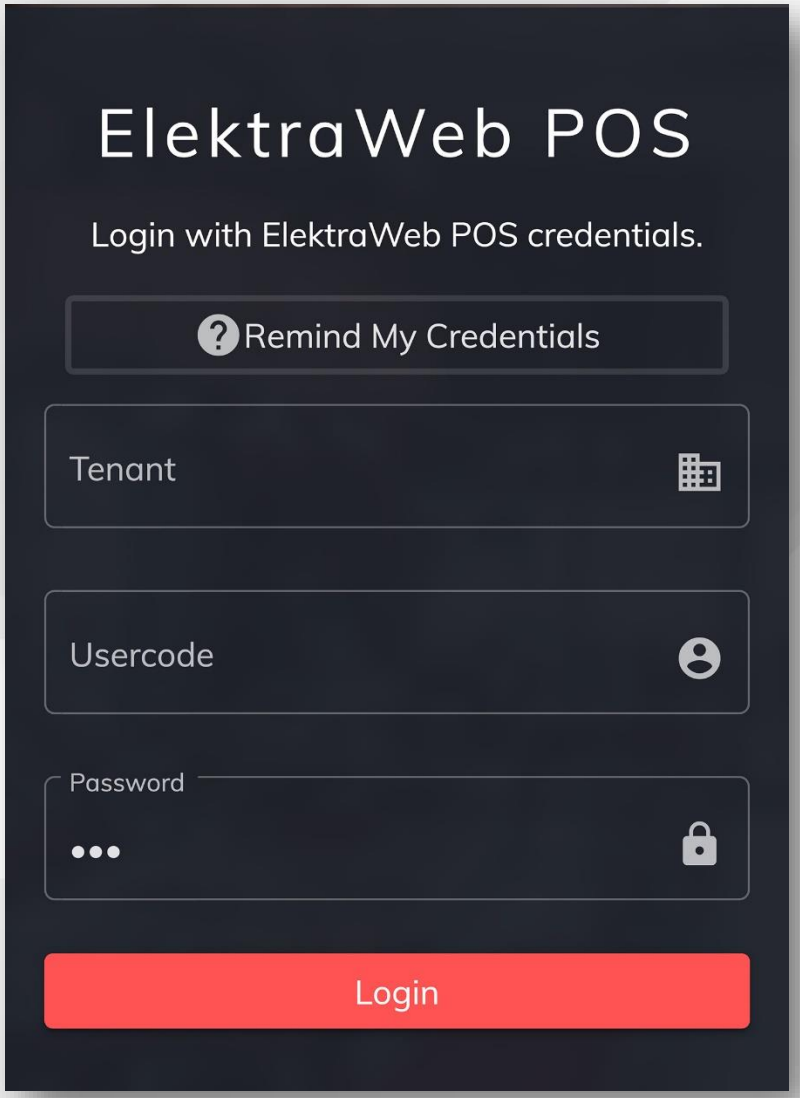
- It is designed in such a way that you can perform the entire operation of the front office (Reservation, Check-in, Check-out, Folio, Blockage, Payments)
- You can access the guest's reservation card, change room and date with a drag and drop, make collections, check-in/check-out transaction entry, and go to the folio.
- You can easily drag and drop a reservation around to modify its room number or accommodation range.
- You can also see your reservations from the online channels that yet not have been assigned a room on top of the blockage screen and drag and drop them to the suitable room.
- The number of empty rooms is displayed at the bottom of the room type and the full occupancy can be seen on top of the chart.
- On this same screen, online channels can be managed and POS transactions can be processed.

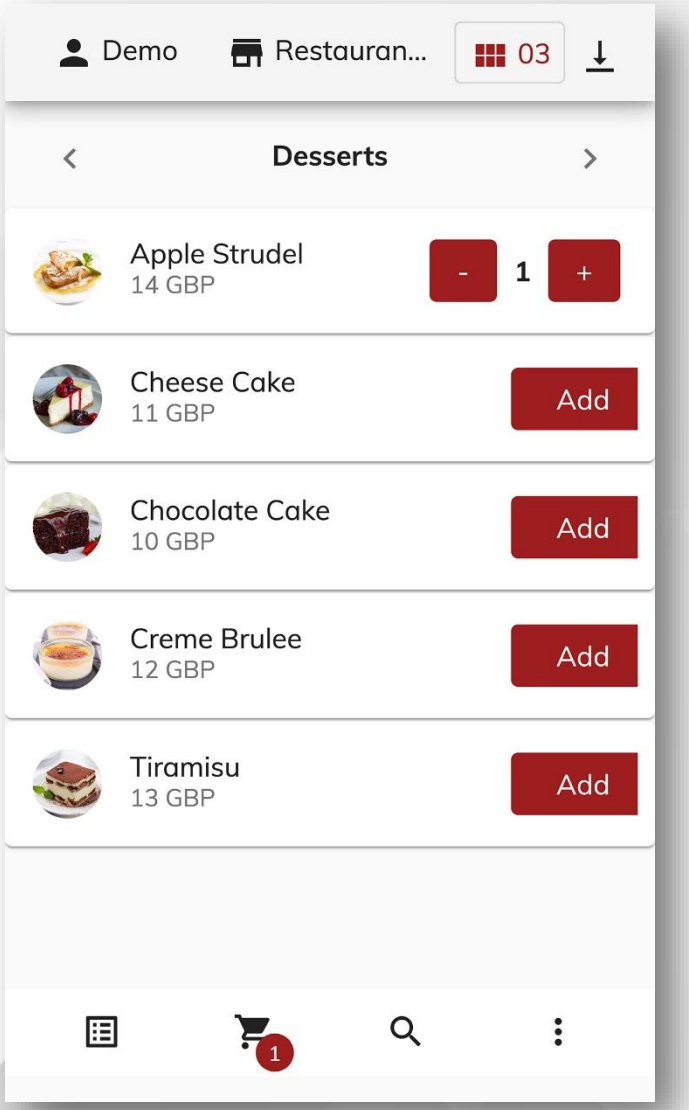
ELEKTRAWEB POS



- Elektraweb POS can be used in different types of properties such as hotels, restaurants, bars, retails, and more.
- Order taking, preparing and serving processes can be followed and performance analysis can be done.

ELEKTRAWEB POS



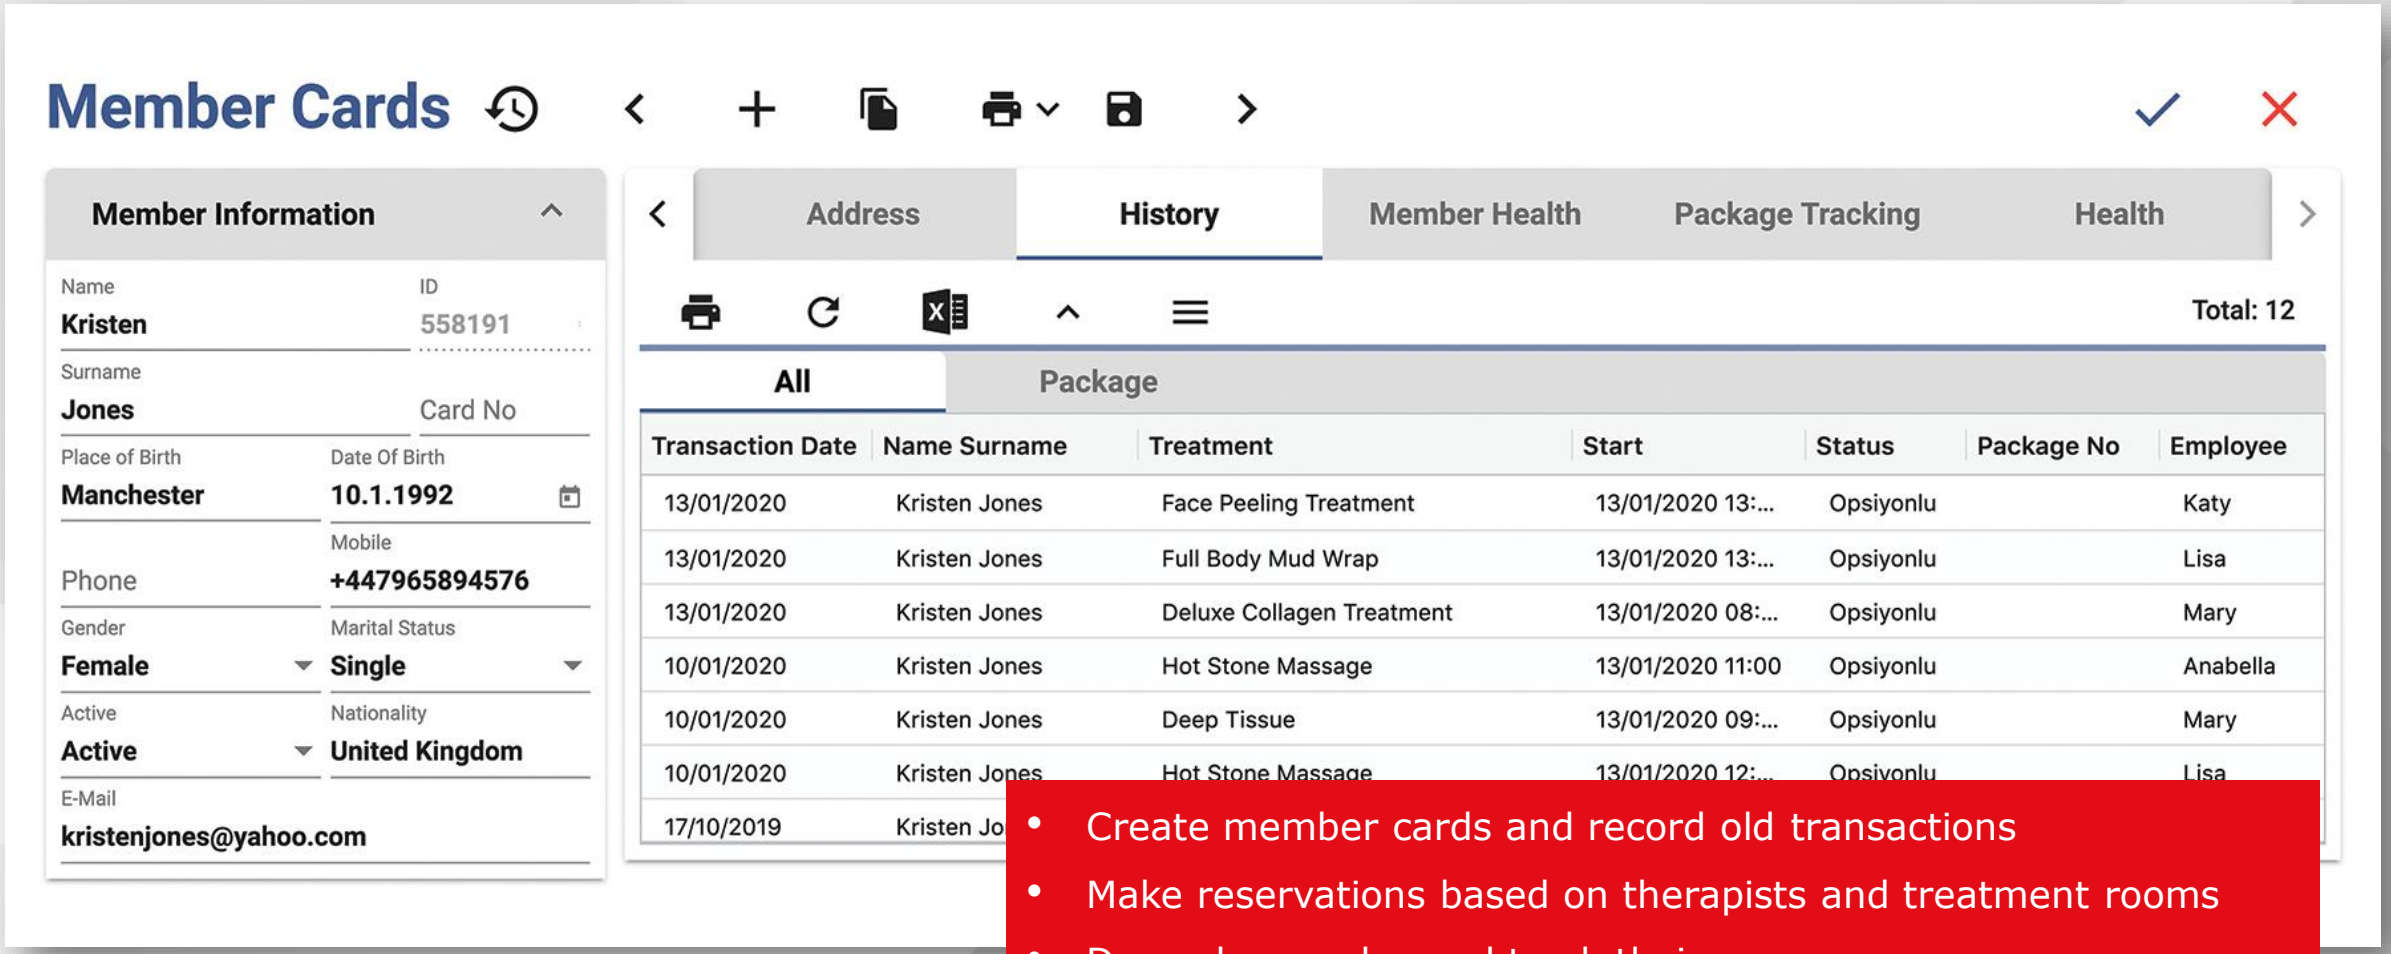


- Elektraweb POS can be used as an app on mobile devices and on the web browser. Therefore you can turn any kind of device into a mobile POS hand terminal and cash register.
- It provides digital menu and online ordering functions for the guests.

ELEKTRAWEB SPA MANAGER

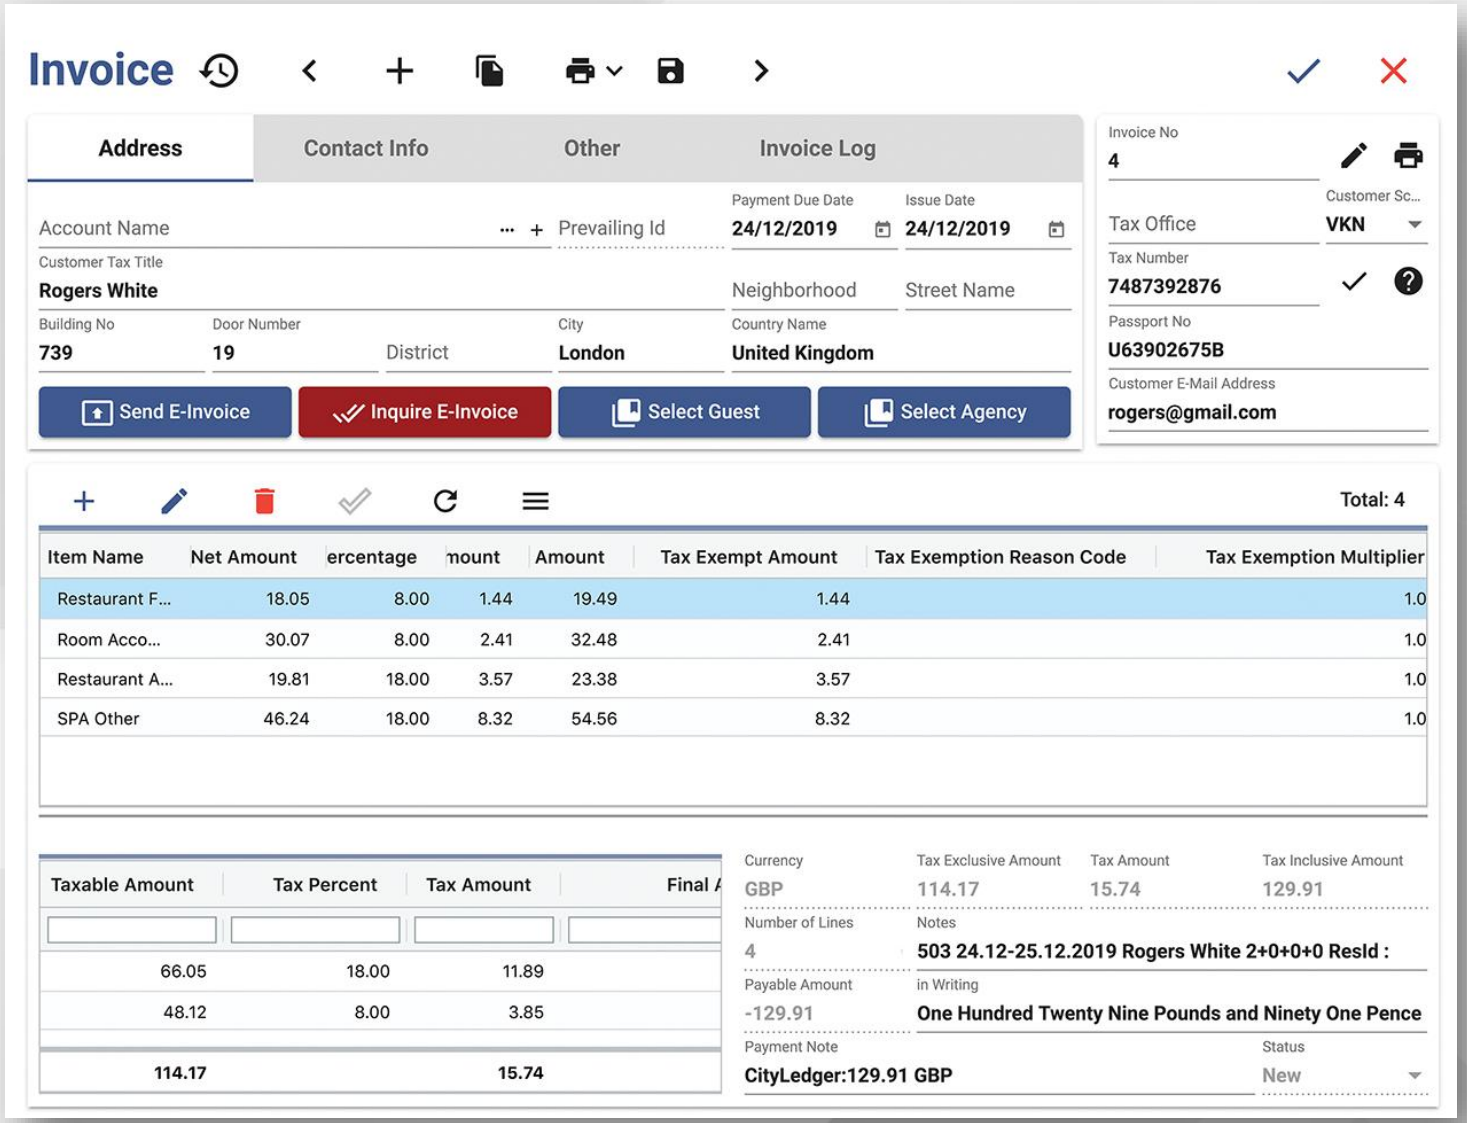
- ElektraWeb Spa Manager is developed for all institutions working on a membership basis such as spa centers, health centers, sport centers, clubs, and associations

ELEKTRAWEB SPA MANAGER



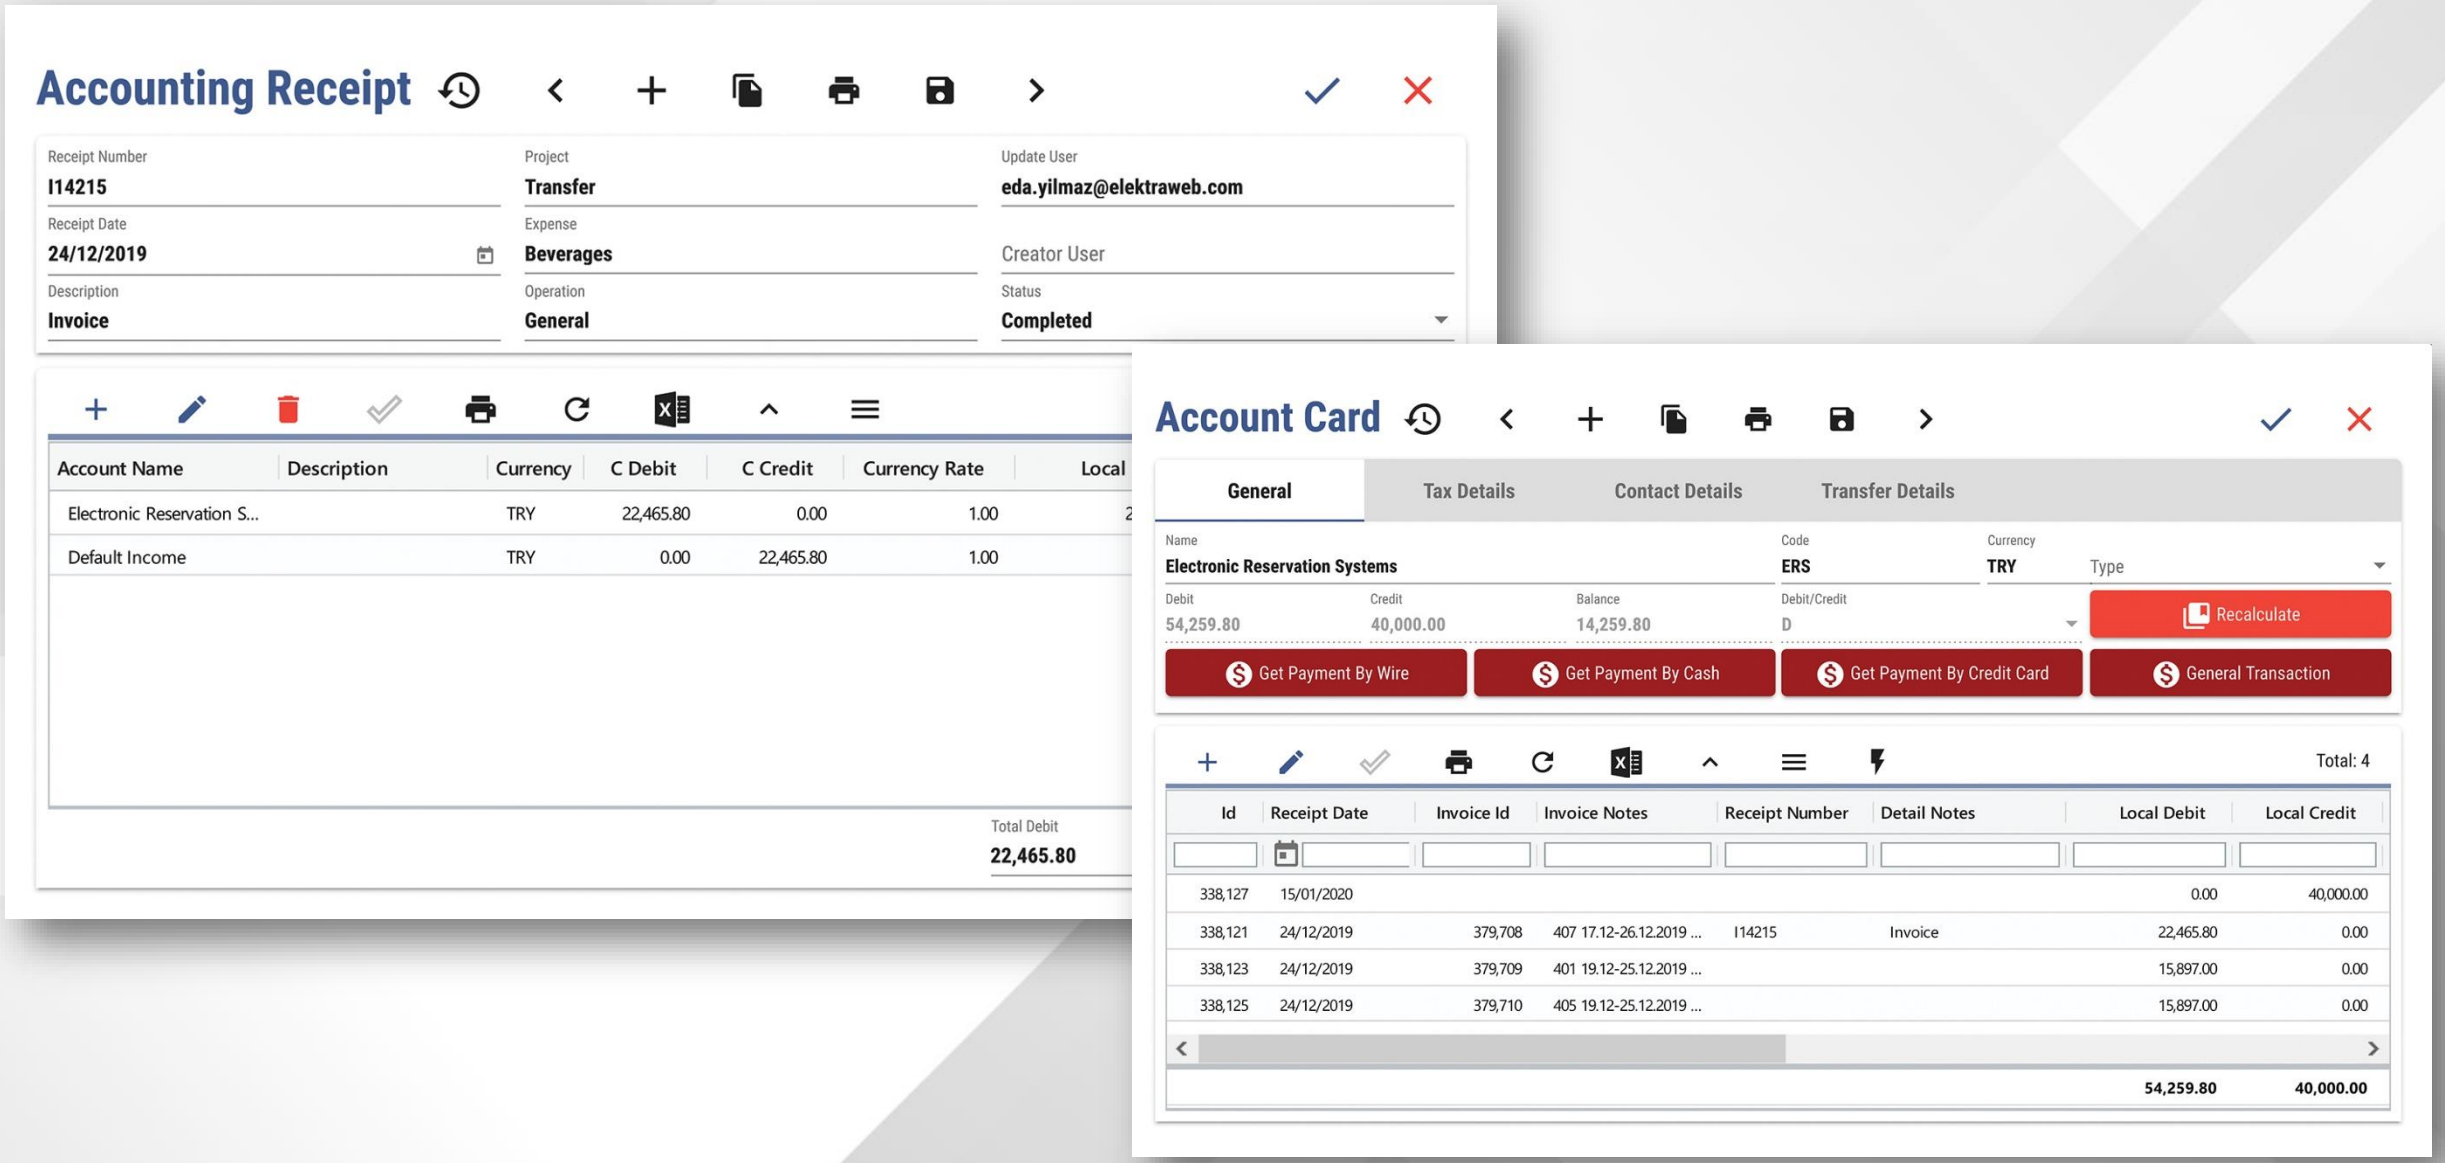
- Create member cards and record old transactions
- Make reservations based on therapists and treatment rooms
- Do package sales and track their usage
- Track employee commissions
- Detailed reports of treatments, memberships, and stock sales

INVOICE & ACCOUNTS RECEIVABLE

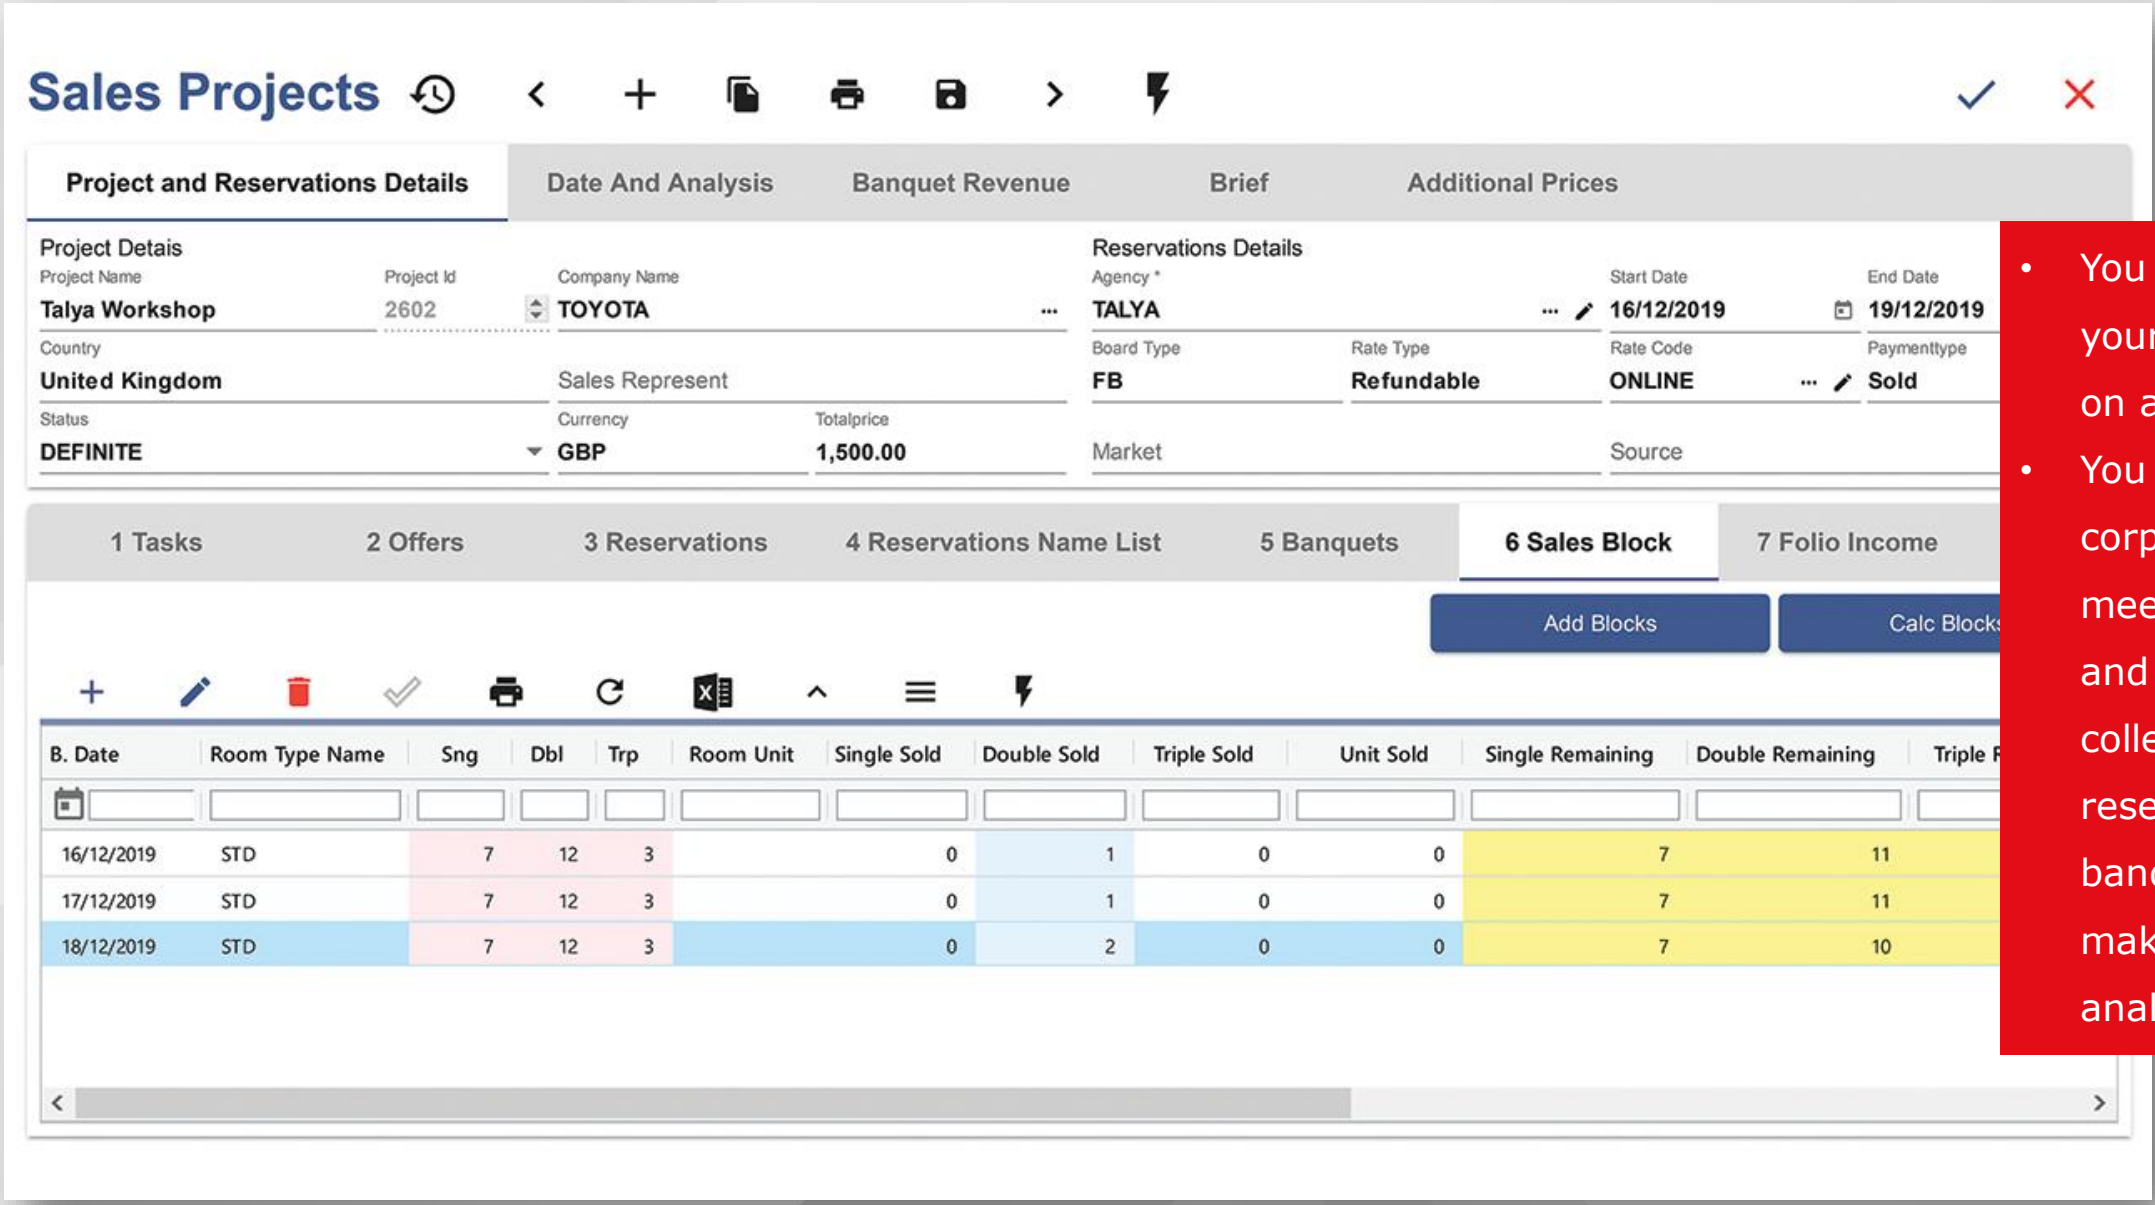


Elektraweb allows you to easily perform preliminary accounting transactions such as current account, credit-debit follow-up, cash follow-up, personnel account follow-up, invoice and waybill issuance, and follow-up of checks and promissory notes.

INVOICE & ACCOUNTS RECEIVABLE



SALES PROJECTS



- You can monitor all your sales projects on a single screen.
- You can follow up corporate/company meetings, offers and contracts, collective reservations and banquet sales, and make income analysis.

HOUSEKEEPING

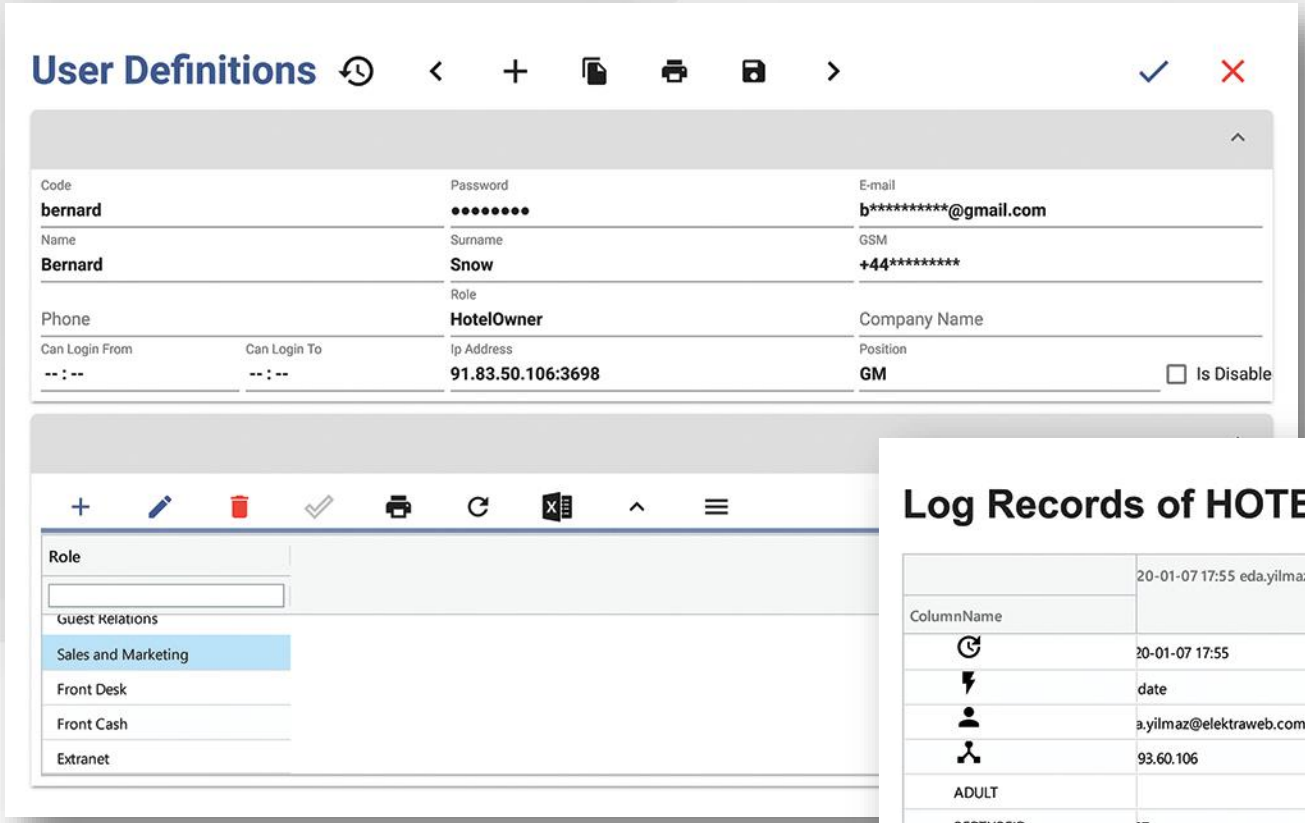
- You can carry out all housekeeping processes in a digital environment.
- You can instantly update your rooms' dirty-clean and minibar statuses, make an efficient job distribution to your housekeepers, and make performance evaluations easily.
- There is automatic and/or manual drag-and-drop distribution of the rooms among the maids.

DETAILED AUTHORIZATION & LOGGING



- By defining roles to users, you can easily limit their visibility and transaction privileges on all screens.
- You can also use logging feature to track all the changes made on IP and user basis.

REPORTING

- It provides all the financial and operational reports you need.
