## Status

Get an insight into your hotel's status with all the numbers, tables and graphics, at any time.

 You can easily use the system with the help of more than 200 training videos.

## Rack

All your rooms and reservations will be on one calendar. From a single screen, you can perform all operations from room cleaning to invoice issue.

The Room Calendar interface allows for efficient management of room status and reservations. It includes:
 

- Room Calendar Grid:** A visual representation of room status (Dirty, Clean) and reservations for each room type (e.g., Deluxe Room, Standard Room) over a period of time.
- Reservation Details:** A pop-up window for editing reservation details, including guest name, phone number, nationality, and room type.
- Action Buttons:** Options to Save, Delete, or Cancel reservations.

## Web Site

Receive payments and sell rooms and packages over your own web page, without paying any commissions.

The Mango Hotel website provides a user-friendly booking experience. Key features include:
 

- Hotel Information:** Details about the hotel's location, amenities, and contact information.
- Room Selection:** A clear display of available room types, such as the Panoramic Room, with descriptions and pricing.
- Booking Process:** A streamlined process for selecting dates, room types, and completing the booking.
- Price Display:** Clear pricing information, including the current rate (486) and any discounts or taxes.

## Front Office

All front office lists and operations are on the same screen, and only one click away...

The Front Office dashboard is a central hub for managing guest reservations and check-ins. It features:
 

- Reservation List:** A table listing reservations with columns for Room No., Room Type, Agency, State, and Guest Name.
- Filters and Actions:** Tools to filter reservations and perform actions like Check-in, Cancel Reservation, and Send to Waiting List.
- Guest Information:** Detailed view of guest information and reservation status.

## Channels

Manage all your online channels (Booking, Expedia etc.) from a single screen.

The Channels dashboard provides a unified view of room availability across multiple online travel agencies (OTAs). It includes:
 

- Channel Grid:** A grid showing room availability for channels like Booking.com, Expedia, HotelsPro, SiteMinder, and others.
- Room Status:** Indicators for room status (e.g., Available, Sold) for each channel.
- Channel Logos:** Visual representation of the connected channels.

## Occupancy Analysis

Get access to complete occupancy and revenue analyses, in both graphic and list format.
